

Meeting Minutes

Franklin Municipal Planning Commission

Thursday, August 27, 2020

7:00 PM

Board Room

Notice is hereby given that a meeting of the Franklin Municipal Planning Commission will be held on the date, time and at the location listed above. Additional information can be found at www.franklinton.gov/planning.

The typical process for discussing an item is as follows:

1. Staff Presentation
2. Public comments
3. Applicant presentation, and
4. Motion / discussion / vote

Applicants are encouraged to come to the meeting, even if they agree with the staff recommendation. The Planning Commission may defer or disapprove an application/request unless someone is present to represent it.

For accommodations due to disabilities or other special arrangements, please contact the Human Resources Department at (615) 791-3216, at least 24 hours prior to the meeting.

The Franklin Municipal Planning Commission Meeting will limit physical access in the meeting room due to current limitations on public gatherings to prevent further spread of COVID-19 and to protect the health, safety, and welfare of the City of Franklin officials, staff, and citizens. Accommodations have been made to ensure that the public is able to participate in the meeting. The public may participate in the following ways: • Watch the meeting on FranklinTV or the City of Franklin website. • Watch the live stream through the City of Franklin Facebook and YouTube accounts. • Call in to the conference meeting 1-312-626-6799; Meeting ID: 910 5624 7555; Password: 178459. Callers will be unmuted and given the opportunity to comment during the meeting at specific times. • The public may email comments to planningintake@franklinton.gov to be provided in full to the Commission and included in the minutes, but not read aloud in their entirety during the meeting. Emailed comments will be accepted until 5:00 PM on the day before the meeting. • Limited viewing will be available in the lobby of City Hall to watch the live video (face masks required). • City YouTube: <https://www.youtube.com/user/CityOfFranklin> • City Facebook Live: <https://www.facebook.com/CityOfFranklin> • City website: <https://www.franklinton.gov/franklontv>

CALL TO ORDER

Chair Hathaway called the meeting to order at 7:00 pm.

Board Members Present: Michael Orr, Jenny Szilagyi, Mike Hathaway, Ann Petersen, Roger Lindsey, and Jimmy Franks

Board Members Absent: Scott Harrison, Marcia Allen, and Alma McLemore

1. Consideration Of Resolution 2020-150, A Resolution Declaring That The Franklin Municipal Planning Commission Shall Meet On August 27, 2020, And Conduct Its Essential Business By Electronic Means Rather Than Being Required To Gather A Quorum Of The Members Physically Present In The Same Location Because It Is Necessary To Protect The Health, Safety, And Welfare Of Tennesseans In Light Of The COVID-19 Outbreak.

1. 2020-150 RES Declaring Need for Electronic Meeting_FMPC_08.27.20.Law Approved

Chair Hathaway asked if there were any public comments for Item 1. There were none.

Chair Hathaway asked for a motion for Item 1.

Commissioner Franks moved, seconded by Commissioner Szilagyi, to Approve Resolution 2020-150.

Chair Hathaway asked for a roll call vote on the motion.

ACTION: Motion to Approve Resolution 2020-150, Item 1, by Commissioner Franks second by Commissioner Szilagyi:

Motion Passed 6-0

AYES: Ann Petersen, Jimmy Franks, Mike Hathaway, Roger Lindsey, Michael Orr, Jenny Szilagyi

NOES: None

ABSTAIN: None

Chair Hathaway read the following statement:

The Franklin Municipal Planning Commission Meeting will limit physical access in the meeting room due to current limitations on public gatherings to prevent further spread of COVID-19 and to protect the health, safety, and welfare of the City of Franklin officials, staff, and citizens. Accommodations have been made to ensure that the public is able to participate in the meeting. The public may participate in the following ways:

- Watch the meeting on FranklinTV or the City of Franklin website;
- Watch the live stream through the City of Franklin Facebook and YouTube accounts;
- Call in to the conference meeting at 1-312-626-6799. The Meeting ID is 910 5624 7555 and the Password is 178459;
- Emailed comments were accepted until 5 p.m. yesterday. These email comments have been provided in full to the Commission and included in the minutes but will not be read aloud in their entirety during the meeting;
- Limited viewing is available in the lobby of City Hall to watch the live video, and face masks are required in City Hall.

APPROVAL OF MINUTES

2. Consideration Of Approval Of July 23, 2020 Minutes.

Sponsors:

Attachments:

1. DRAFT 6 FMPC Minutes July 2020

Chair Hathaway asked for a motion to approve the Minutes from the July 23, 2020 meeting.

Alderman Petersen moved, seconded by Commissioner Orr, to Approve the Minutes.

Chair Hathaway asked for a roll call vote.

The motion passed unanimously.

ACTION: Motion to Approve the July 23, 2020 FMPC Minutes, Item 2, by Alderman Ann Petersen second by Commissioner Michael Orr;

Motion Passed 6-0

AYES: Ann Petersen, Jimmy Franks, Mike Hathaway, Roger Lindsey, Michael Orr, Jenny Szilagyi

NOES: None

ABSTAIN: None

CITIZEN COMMENTS ON ITEMS NOT ON THE AGENDA

The Chair asked for citizen comments.

Mr. Chad Holmes, River Road, is President of the Highlands of Ladd Park Home Owners Association (HOA). Mr. Holmes stated that he was speaking on behalf of 1200 homeowners. He spoke concerning the proposed Envision Franklin amendment for 106 Long Lane to allow a sports complex. He stated that over 80% of the homeowners who participated in a poll were opposed to the proposed Envision Franklin amendment and the sports complex. He requested that the Commission consider the following before voting on this amendment:

1. The Highlands of Ladd Park HOA Board is unanimous in their opposition to the proposed amendment and change in the Land Use Plan.
2. The Highlands of Ladd Park HOA Board state that this proposed amendment is not consistent with Envision Franklin.
3. The Highlands of Ladd Park HOA Board state that this proposed amendment will decrease the quality of life for the residents.

ANNOUNCEMENTS

The Chair asked if Staff had any announcements.

Ms. Amy Diaz-Barriga, Current Planning Supervisor, stated that it was likely that the September Planning Commission meeting will be virtual. She stated that this had not been confirmed at the time of the meeting.

VOTE TO PLACE NON-AGENDA ITEMS ON THE AGENDA

The Chair asked if there were any non-agenda items to be presented. There were none.

CONSENT AGENDA

3. Consideration Of Item 8 For Approval On The Consent Agenda.

Sponsors:

Attachments: None

Chair Hathaway stated that the vote for the Consent Agenda would include Item 8.

Chair Hathaway asked for a motion for the Approval of the Consent Agenda.

Commissioner Lindsey moved, seconded by Commissioner Franks, to Approve the Consent Agenda.

Chair Hathaway called for a roll call vote.

The motion passed unanimously.

ACTION: Motion to Approve the Consent Agenda, Item 3, by Commissioner Roger Lindsey second by Commissioner Jimmy Franks;
Motion Passed 6-0

AYES: Ann Petersen, Jimmy Franks, Mike Hathaway, Roger Lindsey, Michael Orr, Jenny Szilagyi

NOES: None

ABSTAIN: None

ENVISION FRANKLIN PLAN AMENDMENTS

4. Consideration Of Resolution 2020-78, A Resolution To Adopt An Envision Franklin Plan Amendment For The Properties Located At 1155 Hillsboro Road (Known as Brownland Farm, and a portion of Christ Community Church at 1215 Hillsboro Road) Map 63 Parcels 2.00, 2.01, And 2.02, To Change The Design Concepts From Conservation And Conservation Subdivision To Conservation, Conservation Subdivision, Multifamily Residential, And Neighborhood Mixed-Use. (PUBLIC HEARING)

13. Scott Black Comment
14. Bolze Comment 8-18

Chair Hathaway recused himself from Item 4.

Chair Hathaway turned the Chair over to Vice-Chair Lindsey.

Mr. Eric Conner, Principal Planner, stated the subject property is located at 1155 Hillsboro Road, just north of the Intersection of Hillsboro Road & Mack Hatcher Pkwy, known as Brownland Farm, including a small portion of 1215 Hillsboro Road, known as Christ Community Church. The site currently has the Conservation and Conservation Subdivision Design Concepts, and the applicant is requesting to amend the site to have Conservation, Conservation Subdivision, Multi-family Residential, and Neighborhood Mixed-Use Design Concepts.

The site is approximately 190 acres and is bound on the western edge by the Harpeth River. The site currently has approximately 160 acres within the floodplain. He stated that the applicant has indicated they plan to alter the floodplain on the site, reducing it to approximately 104 acres, while providing increased flood storage across the site. Prior to any development, the applicant will need to complete FEMA processes and approval in order to formally change the floodplain on site.

Mr. Conner asked to please keep in mind, this is not a rezoning request. He stated that Brownland Farm is currently zoned

Agriculture, and the church is zoned Civic and Institutional. No zoning change has been requested at this point and no changes to zoning are involved in this request.

Mr. Conner stated that, however, due to the constraints of the property, the only accesses proposed to this site are on Hillsboro Road. He stated that staff brought up concerns regarding this matter and the potential need for a traffic signal at the corner of Hillsboro Road and Monticello Road. If a signal is required at that location, it would not meet City of Franklin standards for distance from an existing traffic signal. Overall, staff is concerned about the potential traffic generated and flowing exclusively onto Hillsboro Road. This item was originally brought forward at the June 25th FMPC meeting, at which, the applicant requested to defer this item until the August 27th meeting, in order to speak at the July Joint Conceptual Workshop, and to further study the traffic impacts and solutions in more detail.

A virtual neighborhood meeting was held for this project on May 13, 2020, which was recorded and uploaded to the City of Franklin webpage. There were a large number of citizens attending the meeting and brought up concerns regarding flooding on the site, access and traffic onto Hillsboro road, commercial uses on the site, and the potential park located on the east side of Hillsboro Road adjacent to the Monticello neighborhood.

Staff received 24 Citizen emails related to this item, as well as an online petition, which were provided to the Commission with your agenda item in Civic Clerk. Of the 24 emails, 1 was in favor and 23 were opposed to the change in Design Concept. Sixteen comments were received for the June FMPC meeting: 2 were in favor, 4 were neutral, and 10 were opposed. The comments generally spoke concerns about traffic on Hillsboro, flooding of the Harpeth, density of the conceptual design, and school capacity. Additionally, some brought up concerns about Monticello Section 1 (the park across Hillsboro, front Monticello subdivision), however, that is not a part of this request, rather potentially a portion of site development following this request. The emails in their entirety are published with the online agenda, and they will be included with the minutes of the meeting.

Due to review time needed for the additional information provided by the applicant, the staff recommended deferral of Resolution 2020-78 to the September 24, 2020 Planning Commission meeting. Mr. Conner stated that the Applicant will provide additional information during the September 24th meeting.

Vice-Chair Lindsey asked if there were any citizen comments.

The following citizens spoke by phone:

1. Ms. Ginger Sherling, 2227 Osburn Road, Opposed - Ms. Sherling represented the organization, Keep Williamson Livable. She stated that they had created a petition to oppose the rezoning of Brownland Farm. The petition was sent to the Planning Commission by email. The petition included 1346 signatures obtained within in one week's time. She stated that some of the signatures were from outside of the Williamson County area, but were from citizens who were connected to the farm's horse show business. She stated that, at the time of the meeting, they had 1555 total signatures. She stated that the citizens who signed the petition also agree with the City Staff's concerns. Their main concern was the change to the Harpeth River's current floodplain. They asked that the Planning Commission not approve this plan.

2. Ms. Dorie Bolze, Harpeth Conservancy, Opposed - Ms. Bolze stated that their concern is that the river currently has several floodways. She stated several there are several challenges. She stated that since there are several floodways, this property will require input from the experts at FEMA. She stated that public safety was a main concern. She stated that there were too many risk issues to consider building a high-density area.

The Applicant was represented by Mr. Greg Gamble, Gamble Design Collaborative. Mr. Gamble was joined by Mr. Kevin Estes. Mr. Gamble stated that they had been working with the City of Franklin Engineering staff and a third-party traffic engineer over the past few months. The traffic analysis has been filed with the City of Franklin Engineering department. Mr. Gamble has received response comments from both parties. Mr. Gamble stated that they are requesting deferral to the next Planning Commission meeting so that they have time to resubmit the traffic study. He stated that a traffic study is not typically submitted with an Envision Franklin amendment request, but there are too many questions without it. The traffic study will clarify what off-site road improvements may be required.

Mr. Gamble stated that they had made changes to the Envision Franklin Plan amendment package since the Joint

Conceptual Workshop. Mr. Gamble showed a map showing the mix of land uses along Hillsboro Road. They reduced the area for Multi-Family to 16.1 acres. Within the Multi-Family area (Christ Community Church Property), they are proposing a Senior Living/Assisted Living Facility. This area is zoned Civic Institutional. The additional proposed Multi-Family area would consist of condominiums and a few for-rent apartments.

Mr. Gamble stated that they had their sixth Neighborhood meeting where there was a lot of participation. They discussed the Mix-Use buildings which are shown on the Concept Plan. Several citizens asked them to provide more landscape and increase the distance from Hillsboro Road. The citizens did find the Mixed-Use plan favorable for possible restaurants and/or office lofts.

He stated that they have committed that at least 10% of the proposed homes would be affordable housing. They will work with the Williamson County Community Housing Partnership (WCCHP) and the Franklin Housing Authority (FHA) to create commitments that are associated with the deeds.

Mr. Gamble stated that there were several questions regarding the floodplain. There is a floodway that crosses the site called the West Harpeth split. He stated that there is a high point where the water naturally drains in two different directions. During a flood event, that water crosses across this part of the property. Mr. Gamble stated that this is not a floodway that occurs continuously and would only occur during a high-water event. They are proposing to redistribute the volume of the floodway, which decreases the square footage of the area of the floodplain, but it does not decrease the volume of the floodplain. They have 320,000 cubic yards of floodplain which they will remove. They will add back 640,000 cubic yards of floodplain, which will double the storage capacity of the floodplain. This change will reduce the current 100-year flood plain area.

Mr. Gamble stated that they will be able to submit the Conditional Letter of Map Revision (CLOMR) with the development plan. This is usually submitted with the site plan. Mr. Gamble discussed a comparison between the Water's Edge development and the proposed Brownland Farms development. He stated that, with the creation of the floodplain area in Brownland Farms, all single-family homes will be three feet above the floodplain and no residential lot will have floodplain on it.

Mr. Kevin Estes discussed the floodplain comparison in more detail. Mr. Estes stated that they had a neighborhood meeting with the residents of Monticello. He stated that the residents' concerns included traffic. He stated that they will wait to discuss the traffic situation until after the City has finished its review. He stated that they are open to change the plan, if needed, for environmental concerns. Mr. Estes also pointed out that 12 acres are already zoned Civic Institution, which permits an assisted living facility, and is not located in the floodplain.

Mr. Gamble stated that he would like to hear the comments from the Commission. He stated that they have requested deferral until the September 24th Planning Commission meeting. They will present the traffic study findings at that meeting.

Vice-Chair Lindsey asked for a motion.

Commissioner Franks moved, seconded by Commissioner Orr, to Defer Resolution 2020-78 to the next Planning Commission meeting on September 24, 2020.

Vice-Chair Lindsey asked for any discussion on the motion.

There being none, Vice-Chair Lindsey asked for a vote on the motion.

Vice-Chair Lindsey asked for a roll call vote.

The motion carried unanimously.

ACTION: Motion to Defer the Resolution 2020-78 to the Planning Commission Meeting on September 24, 2020, Item 4, by Commissioner Jimmy Franks second by Commissioner Michael Orr;

Motion Passed 5-0

AYES: Ann Petersen, Jimmy Franks, Roger Lindsey, Michael Orr, Jenny Szilagyi

3. COF 7295 Berry Farms Reams-Fleming Tract PUD Subdivision, Development Plan, Revision 2 8.4.2020_Part 2
4. COF 7295 Berry Farms Reams-Fleming Tract PUD Subdivision, Development Plan, Revision 2 8.4.2020_Part 3
5. 7295 BF Reams-Fleming DP Rev 2_Conditions of Approval_01

Vice-Chair Lindsey turned the Chair back over to Chair Hathaway.

Mr. Joseph Bryan, Principal Planner, stated that the purpose of this revision to the Berry Farms Reams-Fleming PUD Subdivision Development Plan is to revise the internal street network within the development. The subject property is comprised of 45.17 acres and is located at 1011 Reams Fleming Boulevard. There are no requests to revise the entitlements or change the development boundaries with this request. The original concept plan for this property was approved in July 2006. A revised Development Plan incorporating the Ramsey Solutions Headquarters campus was approved in March 2015.

Staff recommended approval with conditions of the revised Development Plan for the Berry Farms Reams-Fleming Tract PUD Subdivision. See attached sheets for Conditions of Approval.

Chair Hathaway asked if there were any citizen comments. There were none.

The Applicant was represented by Mr. Mark Spalding, Gresham-Smith. He stated that they have agreed to the Conditions of Approval.

Chair Hathaway asked for a motion.

Commissioner Orr moved, seconded by Commissioner Lindsey, to recommend Approval.

Chair Hathaway asked for any discussion on the motion.

There being none, Chair Hathaway asked for a vote on the motion.

Chair Hathaway asked for a roll call vote.

The motion carried unanimously.

ACTION: Motion to recommend Approval, Item 5, by Commissioner Michael Orr second by Commissioner Roger Lindsey;

Motion Passed 6-0

AYES: Ann Petersen, Jimmy Franks, Mike Hathaway, Roger Lindsey, Michael Orr, Jenny Szilagyi

NOES: None

ABSTAIN: None

6. Consideration Of Ordinance 2019-57, An Ordinance To Rezone 1520.03 Acres From Planned (PD 1.80/500,000) District And Detached Residential 1 (R-1) District To Planned (PD 2.26/250,000) District For The Property Located South Of Highway 96 And West Of Boyd Mill Pike (Westhaven PUD Subdivision).

Attachments:

1. MAP Westhaven RZ and DP
2. ORD 2019-57 Westhaven Development Plan_with Map.Law Approved 5
3. COPY 2020-08-06 Westhaven PUD Subdivision Rezoning Revision 5
4. Combined Citizen Comments 8.27.2020 FMPC

Ms. Diaz-Barriga stated that this item was deferred at the May 28, June 25, and July 23, 2020 Franklin Municipal Planning Commission meetings. Ms. Diaz-Barriga stated that there had not been any changes since the July agenda.

The residential entitlement request of 3,441 units is a reduction from the original request of 3,516 residential units. It is an increase from the current entitlement of 2,750 residential units. An additional 7 acres are being added to the project area from the previous approved development plan.

The development plan has been submitted concurrently. In addition to scaling back on the additional residential units requested with this revision, the development plan no longer proposes gas pumps.

This request does comply with Envision Franklin which identifies this area with the Design Concepts of Mixed Residential and Neighborhood Mixed Use.

Staff recommended Approval of Ordinance 2019-57 to the Board of Mayor and Aldermen.

Chair Hathaway asked if there were any citizen comments.

The following citizens commented:

1. Mr. Norm Hayes, Westhaven resident, In Favor Of - The citizen stated that he had lived in Westhaven since 2014 and supported the plan.
2. Mr. Littleton, Westhaven resident, In Favor Of - The citizen stated that Southern Land Company was an excellent company with a history of quality.
3. Ms. Angela Crutcher, 1906 Columbia Ave., In Favor Of- She stated that she supports the changes in the concept plan.
4. Ms. Pam Lee, 1979 Championship Blvd, In Favor Of - She stated that this plan was a compliment to the Morning Pointe Living Facility across from Westhaven.

The Applicant was represented by Mr. Tim Downey, Southern Land Company. Mr. Downey was the developer of Westhaven over twenty years ago. He stated that Mr. Ben Crenshaw would make a presentation. He stated that they were asking to reduce the Commercial area by 250,000 square feet and, instead, add 275 homes throughout the development. For the Jewel property, they are asking to add an Independent Living Facility and 55+ Senior housing. He stated that approximately 1000 Westhaven residents had expressed an interest in this plan. These residents want to stay in Westhaven.

Mr. Ben Crenshaw stated that Westhaven is a series of inter-connected neighborhoods that has open spaces and connectivity. They have eight neighborhood squares. He stated that it is a walkable and bikeable community. They have 49% open space. He stated that there are events that help make this a community. He stated that Initiative #1 is on the west side of Mack Hatcher Parkway. The current plan has 500,000 square feet of commercial units. The proposed plan reduces this to 250,000 square feet of commercial units. They would add 275 residential units.

Mr. Crenshaw stated that revisions had been made to the plan since the presentation in May. They would reduce the proposed West residential units by 75 and also remove the gas pumps. They are adjusting the housing sizes and types to match the existing neighborhood. They will be extending the multi-use path and have 49% open space. They will add more pools and playgrounds. There will also be an 11-acre area dedicated to the City for a park.

Mr. Crenshaw stated that Initiative #2 will be the "front door" to Westhaven. This property is on the east side of Mack Hatcher Parkway. They are proposing zero commercial units and 416 residential units. The plan will be for Multi-Generational Living at Westhaven. The housing will be age-restricted, maintenance free housing, and Independent Living Facility. There will be exclusive amenities suited to the resident needs. This will be a walkable community and inter-connected neighborhood. This area will have 39% open space and have age appropriate amenities.

The modified grid disperses traffic circulation and provides multiple routes. The Westhaven Traffic Study shows a 23% reduction in trips generated from current entitlements. Approximately 74% of the of the proposed development increase is adjacent to arterial roads. He stated that Mack Hatcher Parkway is scheduled for completion in 2021. They will not propose any connections or extensions until Mack Hatcher Parkway is completed.

Mr. Crenshaw stated that they conducted over 20 resident and neighborhood meetings. They were advised that they needed to communicate more with the surrounding neighbors. They set up a Resident Advisory Committee. He stated that they want to apply the same design quality that they have had over the last twenty years.

Chair Hathaway asked for a motion.

Commissioner Franks moved, seconded by Commissioner Orr, to recommend Approval of Ordinance 2019-57 to the Board of Mayor and Aldermen.

Chair Hathaway asked for any discussion on the motion.

There being none, Chair Hathaway asked for a vote on the motion.

Chair Hathaway asked for a roll call vote.

The motion carried unanimously.

ACTION:	Motion to Recommend Approval to the Board of Mayor and Aldermen for Ordinance 2019-57, Item 6, by Commissioner Jimmy Franks second by Commissioner Michael Orr; Motion Passed 6-0
AYES:	Ann Petersen, Jimmy Franks, Mike Hathaway, Roger Lindsey, Michael Orr, Jenny Szilagyi
NOES:	None
ABSTAIN:	None

7. Consideration Of Resolution 2019-130, A Resolution Approving A Revised Development Plan For Westhaven PUD Subdivision For The Property Located South Of Highway 96 West And West Of Boyd Mill Pike.

Sponsors: Amy Diaz-Barriga, Emily Wright

Attachments:

1. MAP Westhaven RZ and DP
2. COF RES 2019-130_7133 Westhaven Development Plan_with Map.Law Approved 5
3. 7133 Conditions of Approval_05
4. Overall Site Layout Sheet Only_Westhaven PUD- Development Plan- Revision 5
5. Complete Development Plan package

6. Combined Citizen Comments 8.27.2020 FMPC

Ms. Diaz-Barriga stated that the proposed development plan is consistent with the goals and guidelines of Envision Franklin. This proposal changes commercial entitlements from 500,000 square feet to 250,000 square feet. Currently, 178,902 commercial square feet exist, leaving 71,098 for future commercial development.

The residential unit count reflects a reduction from the original request of 3,516 residential units. It is an increase to 3,444 residential units from the current entitlement of 2,750 residential units. An additional 7 acres are being added to the project area from the previous approved development plan.

In addition to scaling back on the additional residential units requested with this revision, the development plan no longer proposes gas pumps.

Westhaven PUD Subdivision, Development Plan, Revision 4 was approved administratively in December 2019.

There are Project Considerations. Westhaven is proposing a flexibility in their unit types of 20%; therefore the actual number of each unit type could vary by 20% without returning to FMPC or the Board of Mayor and Aldermen (BOMA) for approval, but the overall total count of residential units will not increase. For example, the current plan shows 150 townhomes, a variation of 20% would be an additional 30 townhomes. So, the actual total of number of townhomes could be 180. The current plan shows a total of 895 single family homes, this could decrease as much as 179 units to a total of 716 dwelling units.

The plan shown in the submitted documents do not show all entitlements asked for by the applicant. Their entitlement request is a maximum, but full build out is not portrayed on their plans.

Staff recommended Approval, with conditions, of Resolution 2019-130 to the Board of Mayor and Aldermen.

Chair Hathaway asked if there were any citizen comments. There were none.

The Applicant was represented by Mr. Ben Crenshaw, Southern Land Company. Mr. Crenshaw stated that the Commissioners and Staff had been sent several emails and a petition showing support of the proposed plan.

Chair Hathaway asked for a motion.

Commissioner Franks moved, seconded by Commissioner Szilagyi, to recommend Approval, with conditions, of Resolution 2019-130 to the Board of Mayor and Aldermen.

Chair Hathaway asked for any discussion on the motion.

There being none, Chair Hathaway asked for a vote on the motion.

Chair Hathaway asked for a roll call vote.

The motion carried unanimously.

Subject: Item 4 for 8/27 Planning Commission Meeting - Brownland Farm

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Dear Planning Commissioners and Staff,

The Keep Williamson County Livable Team was asked by the neighboring community of Brownland Farm to create a petition for citizens opposed to the rezoning of Brownland Farm. On their behalf, I am attaching for your review the 1340 signatures and comments obtained in just one weeks time. This petition will remain open and will continue receiving signatures. We note that since it is a free web based petition, some out of Tennessee have signed in support, but we also found out that

some of these people are those who have been involved in the equestrian competitions and shows at Brownland and feel they have a vested interest and concern. Some have actually financially invested into Williamson County.

To view Petition:

www.change.org/p/oppose-high-density-and-mixed-use-development-on-brownland-farm

In The Franklin City survey and those conducted by our County Government and Franklin Tomorrow's Table Talks, citizens are opposed to the continued push to develop every square inch of open space in the City of Franklin or to have mini cities pop up in a field where the character of the area becomes totally destroyed. The infrastructure does not support the masses that are here now and there is not enough money or revenue source to provide what is necessary.

The Brownland Farm has many environmental constraints for development and the citizens do not want to see the Harpeth River, floodway, or floodplain altered in any way. They know to do so only will create problems for those currently living in neighborhoods along the river and for those who may choose to live on this developed land. When the river floods, it travels over Hillsboro Road and traffic is a major concern for them. They are concerned about emergency first responders' ability to assist in the event of a major disaster. To quote one comment from the petition:

"My house exploded on Burlington pass due to the Harpeth river flooding in May 2010. No family should have to go through what we did. No family should have to live with without baby photos, videos and precious momentos. Please vote against this plan to expand".

Attached is also a video of the flood that the citizens wanted you to view showing the force of water crossing Hillsboro Rd by Christ Community and Brownland Farm.

Just like a developer can submit a proposal to the Planning Commission for a revision to Envision Franklin, citizens want to do this as well. The current design concept in Envision Franklin for Brownland Farm and the entire Northwest rural area of Franklin is Conservation subdivision. There are concerns that citizens and Aldermen have recently raised that the Conservation Subdivision concept will **NOT** enable the city to meet one of its key guiding principles of historic preservation in Envision Franklin. The last large rural area is crucial to the city and the regions' rural, agricultural and historic character. It includes the deep history of the equestrian industry that is a core character to

Franklin's history. Citizens would like to work with the city to review and update a special plan for this area to explore how to support the city's rural heritage and equestrian industry.

As stated from the cover of our petition, please **consider** the importance to the local economy from the equestrian industry, where TN ranks 4th in the nation in equine population that generates \$30 million annually just in Williamson County. Brownland Farm alone generates \$22.8 million for local businesses annually.

For the health, welfare and safety of our community, please do not approve the rezoning of Brownland Farm.

Regards,

Keep Williamson County Livable

Keep Williamson County Livable

Recipient: City of Franklin Elected and Appointed Officials

Letter: Greetings,

Please Vote NO on Brownland Farm Rezoning

Signatures

Keep Williamson County Livable

Recipient: City of Franklin Elected and Appointed Officials

Letter: Greetings,

Please Vote NO on Brownland Farm Rezoning

Comments

Name	Location	Date	Comment
Kathy Webber	Franklin, TN	2020-08-17	"Altering 54 acres of floodplain to build a dense community will endanger all living in the area."
Kathy Webber	Franklin, TN	2020-08-17	"189 acres with 158 acres of flood plain proposing to reduce flood plain to 104 acres. Leaving 83 acres to build 750 homes and commercial buildings!!! This is unsafe especially in the event of a disaster. Too many people in a small area pinned in by the river that floods. This property should remain as zoned in hopes that someone else will buy to protect the equestrian needs in the area."

This is unsafe especially in the event of a disaster. Too many people in a small area pinned in by the river that floods. This property should remain as zoned in hopes that someone else will buy to protect the equestrian needs in the area."
Caroline Bradshaw	Nashville, TN	2020-08-18	"Horses not houses"
Andreana Flenner	Wilmington, NC	2020-08-18	"This is a vital part of local lore and economics"
Jocelyn Stephens	Franklin, TN	2020-08-18	"I'm a local equestrian. I have watch one beautiful horse farm after another chopped up into mega builds. While the area is growing, more needs to be done to develop with intention and care for those very features that attracted people here in the first place. Why can't it be made easier to increase density in existing neighborhoods? There are so many, after all."
Cheryl Nesbit	Franklin, TN	2020-08-18	"Leave some land for beauty and other uses than making a developer wealthy. Why are people wanting to live here? Because in Franklin you can breathe and it is beautiful. Keep it that way!"
Anne Goetze	Franklin, TN	2020-08-18	"A Land Use Plan has saved many a city, which is what Franklin has become. Ours must be implemented and not ignored or we will all suffer the consequences."
Denise Hopkins	columbia, TN	2020-08-18	"Franklin is already a huge congested mess. 750 new homes, this close, is just ridiculous. Money and Greed have already mis-shaped the beautiful small town of Franklin. no!!!"
Pamela Woods-Lunny	Sonoma, CA	2020-08-18	"I live in Franklin and don't want to see this horse property destroyed and/or high density building in this area."

Name	Location	Date	Comment
Becky Wenzel	Brentwood, TN	2020-08-18	"Too many high density neighborhoods are ruining Franklin. We need responsible growth!"
Dan Miller	Nine Mile Falls, WA	2020-08-18	"This is a common problem across America and frankly it needs to stop."
Linda McGill	Franklin, TN	2020-08-18	"I moved here for the supposed promise of protected green spaces, protected hilltops, historic preservation values, and gorgeous horse country. The planning commission is ignoring all these former Franklin values."
nancy oleary	Franklin, TN	2020-08-18	"My house exploded on Burlington pass due to the Harpeth river flooding in May 2010. No family should have to go through what we did. No family should have to live with without baby photos, videos and precious momento's. Please vote against this plan to expand."
Brenda Kessell	Franklin, TN	2020-08-18	"Development of this property is not in the long term best interests of Williamson County. It is a short term money grab."
Barbara Knieriem	La Vergne, TN	2020-08-18	"Barbara Knieriem Franklin TN"
Amanda Merriman	Franklin, TN	2020-08-18	"I have great concern about altering the flood plan along the Harpeth River. These issues must be fully addressed before any development is allowed to proceed."
Rosa Jean Thompson	Culleoka, TN	2020-08-18	"I'm a local equestrian and have shown at Brownland and/or visited there several times. I say NO, a resounding NO to the 84 acre development. It will ruin everything. Is nothing sacred anymore except money?"
Patricia Reddick	Franklin, TN	2020-08-18	"Patricia Reddick"
Melanie Iemon	Franklin, TN	2020-08-18	"Melanie Iemon"
Debbie Priester	Franklin, TN	2020-08-18	"I am signing because I value the beautiful farm land and pastures in Williamson county. I am concerned about the impact of high density development in the quality of life for people already calling Williamson County home. The traffic will only get worse and the schools will be overwhelmed. Current tax payers will pick up the cost of this. Biggest concern is flooding of areas downstream of projected development on their property."
michael williams	Franklin, TN	2020-08-18	"Hate to see such a nice horse facility go and 700 houses go on it. Plus all the traffic this will put in that area. They also want to reroute the flood plan area. Vote NO on this zoning. We do not need all this development in Franklin and Williamson Country."
Amy Biagini	Nashville, US	2020-08-18	""Franklin, my dear, I don't give a damn" is what we keep hearing. Tired of it."
Kyzlic Lyman	Franklin, TN	2020-08-18	"The heritage and history of brownland needs to be preserved! Countless parts of Franklin are being destroyed or run out for nothing more that tourist attractions! Brownland is an important place for many of us born and raised in this town! It is ridiculous

Name	Location	Date	Comment
			and unfathomable to get rid of such a important place within our community!"
David Henderson	Franklin, TN	2020-08-18	"Floodplain!"
jones jones	Brentwood, US	2020-08-18	"I love horses and would love to see this land preserved"
Judy Flatt	Brentwood, TN	2020-08-18	"We absolutely LOVE the picturesque beauty of Williamson County - so many beautiful farms and green spaces. There are some things that money can't buy - please do not destroy the natural beauty of this county buy bulldozing and paving over our pastures, fields and forests!!!"
Dewayne Brown	Franklin, TN	2020-08-18	"- move back to wherever you came from !! Franklin is FULL"
Lee Williams	Franklin, US	2020-08-19	"I am signing as I do not think this is the appropriate development for this property. Ideally it would stay an equine event facility or boarding training farm but barring that high density is not the way to go in this location. Monticello across the road has larger lot sizes, the homes behind there on Deerfield lane and Deerfield Court have acreage around them. On that side of Mack Hatcher the Rec Center has open space, BGA has it also. The Methodist church has many acres although they may at sometime decide to sell but right now lower density is what fits the area. Lets keep higher density development in Cool Springs and the I-65 corridor. I am also concerned about the flood potential. The engineer for the developer says he can move around dirt and mitigate the risk of flooding."
Winifred Kraft	Franklin, TN	2020-08-19	"No building should ever be permitted on flood plain."
Leslie Edwards	Brentwood, TN	2020-08-19	"I do not want to see more horse farms destroyed in the area. Love the land and want it preserved. No more homes"
Jennifer Reimold	Orange Park, FL	2020-08-19	"As the mother of seven children, including four little girls that ride, we moved into an existing home in Franklin due to its farms and charming community appeal. We evacuated here from Florida during Hurricane Irma and fell in love with the town. One of the major reasons we left Florida was due to over development and houses being built on top of one another destroying the local infrastructure. As the daughter of a land developer, I understand the need for growth however it should not come at the cost of historic green spaces and farms that are a symbol of this community."
Taylor Topping	Franklin, TN	2020-08-19	"Brownland Farm and the horse shows hosted there provide timeless memories for people of all ages. It is a part of the history of Franklin and deserves a chance to remain active in peoples lives - not be destroyed by developers looking to make a quick dollar. I grew up riding at Brownland and it will forever hold a special place in my heart and so deserves a chance to provide theses memories for generations to come."
Martha Smith	Franklin, TN	2020-08-19	"I am signing this petition because I feel that the proposed plan will create an overload of traffic in this area. This land is beautiful and the current plan should be scrapped and conservation of this land should be reinstated."

Name	Location	Date	Comment
Andrea Creek	Franklin, TN	2020-08-19	"Envision Franklin plan was created for a reason, and it needs to be upheld. Overriding it for this development will open the way for other requests like this one to be approved in the future. A less dense development makes much more sense here. Also, I can't understand how this won't impact flooding in surrounding areas or that it won't be a significant traffic issue—it's already very congested in this area at busy times of the day. (I have seen/read the developer's plan.)"
Bettina Carpenter	Franklin, TN	2020-08-19	"Bettina Carpenter"
Margaret Christian	Nashville, TN	2020-08-19	"Because this is wrong. We need this historic land."
Dena DiVito	Franklin, TN	2020-08-19	"Enough is enough! The powers that be are ruining what made Franklin so special!!!"
Katie Decker	Franklin, TN	2020-08-19	"I don't want the flood plain for my neighborhood to be disturbed!"
Sarah Blair	Nolensville, TN	2020-08-19	"We must maintain some green space and farms that protect the beauty, history, and character of this county!"
Ellie Chason	Franklin, TN	2020-08-20	"I've lived in area for 20 years. Brownland should remain an equestrian event center or become park/green space similar to Harlindale Farms. We do not need another heavily developed subdivision this close to Fieldstone Farms and Westhaven."
Jennifer Bangham	Georgetown, TN	2020-08-20	"I live here and I don't want our property values to decrease."
Cheryl Crockett	Franklin, TN	2020-08-20	"I am a resident that could be affected by the change in the floodplain. Also I moved to Franklin 30 years ago because of the beauty of the surrounding area. It is no longer as beautiful. I will be looking to move in the next few years. Very sad."
Michelle Gonzales	Brentwood, TN	2020-08-20	"Williamson County is overgrown for it's infrastructure now. Stop adding new developments until there is work done NOW.....not in 10 years!"
Karen Logan	Franklin, TN	2020-08-20	"We don't have natural lakes, ocean or mountains in Middle TN. All we have are the rolling hills, and wide open spaces. Farms with horses, bison & llamas. If we over develop this area what are we left with? In the words of Joni Mitchell, "Oh it always seems to go, that we don't know what we got till it's gone. Pave paradise, & put in a parking lot.""
Elizabeth Havert	Murfreesboro, TN	2020-08-20	"The equine community has too many shrinking options in middle Tennessee....this place is important!"
Carolyn Richardson	Brentwood, TN	2020-08-20	"The facilities that honor our traditions in Williamson County are disappearing. If places where high level horse shows are taken away, then the farms and riding stables will be close behind them, changing forever the essence of our way of life."
Abigail Griffith	Franklin, TN	2020-08-21	"High density should not consume what's left of this precious area of the county. More homes means more roads and less countryside"

Name	Location	Date	Comment
Richard Hitt	Franklin, TN	2020-08-21	"Franklin's infrastructure doesn't support even the current population. Such high-density structures so near an already over-used intersection will only make matters worse."
Emily Nevils	Nashville, TN	2020-08-21	"It's the right thing to do"
Marianne England	Murfreesboro, TN	2020-08-22	"Brownland Farm is an epically beautiful space that allows the Harpeth River it's space for nature and also an staple of the Middle TN equine culture."
Diane Hash	Santa Fe, TN	2020-08-22	"This kind of density sets a bad precedent. 750 homes on 84 acres?!? Do the math. Unless you add high rise developments and that would be disastrous."
Laura Ippuner	Columbia, TN	2020-08-22	"Keep Harpeth Park zoned Agricultural. Let's not lose our beautiful surroundings to greedy developers."
Theresa Laflamme	Springfield, TN	2020-08-22	"This land needs to stay agricultural."
Cindy Love	Brentwood, TN	2020-08-22	"As a local Equestrian farm owner, we moved here because of the beautiful farm land, open spaces. We were told the communities, Franklin, College Grove, etc... would protect and keep green spaces. Very disappointed and sad."
April Marbury	Brentwood, TN	2020-08-22	"The pull to Williamson County includes many facets...good schools, good jobs, great community feel...BUT, the beauty of the rolling green hills, big farms, green space is what makes the county unique and attractive. It provides the complete "package" to why Williamson County is special."
Ame Van Iden	Sherman Oaks, CA	2020-08-22	"We need to protect the natural beauty of this area -it's why many people move and visit here."
Lee Williams	Franklin, US	2020-08-22	"I am signing for several reasons. The density is too high for this piece of property. The high density developments need to be in Cool Springs and along the I-65 corridor. If someone could reasonably buy this property and keep it a equestrian facility it would continue to support the vital equine community of Franklin & Williamson County. The proposed changes to the flood plain are concerning. The proposed development would have many acres of green space that would supposedly be open to the citizens of Franklin but I have not gotten an answer from Franklin Parks as to whether they would maintain it or the developments HOA fees would. If the HOA fees would go towards the maintenance then I don't see how it would be open to the citizens at large."
Marisa Fernandez	Franklin, TN	2020-08-23	"I'm an equestrian and have attended shows at Brownland many times, and volunteered at events including Saddle Up's fundraiser. It is so disappointing to learn that this gem of a show ground might be replaced with 1000 homes. This uncontrolled development must be reined in before every hillside, open space and farm in Franklin is paved over. Horses and other livestock require acreage and green space. Those organic veggies/fruits sold at the Farmer's Market don't grow in concrete. Our elected officials must be urged to stop ruining the quality of life in Franklin!"

Name	Location	Date	Comment
Margie Thessin	Franklin, TN	2020-08-23	"WHY do we continually make zoning plans and then allow variances? Make a plan and stick to it. It is also not necessary to develop every square inch of Franklin, especially land in flood plain. Enough!"
Katelyn Harris-Schuman	Madison, TN	2020-08-23	"There are too few open spaces left and I am an active member of the equestrian community."
Karen Boates	Gurley, AL	2020-08-23	"We all need to have some open space."
Joanne lowery	Fayetteville, TN	2020-08-23	"There are precious few properties like this one left and it would be a shame to see the history and memories of so many equestrian's wiped from the face of the earth."
Shevawn Stewart	Franklin, TN	2020-08-23	"We came up with a zoning plan to protect our rural landscape. Why are we trying to change that?? We need to keep this area the beautiful place we know and love!"
H Chris	Japan	2020-08-24	"I think that this is a disgrace. Development is permanent. I am investing most of my money into Williamson County into preserving land, but I cannot fight the dirty developers who flout the rules by changing them to their advantage."
Pat Garmezy	Nashville, TN	2020-08-24	"Franklin needs to keep its green space; wall to wall home will ruin the charm of Franklin and what makes Franklin special"
Joy Brandon	Franklin, TN	2020-08-24	"Gentry Farm is a Franklin ICON and must be preserved!!# Ask anyone who grew up here where to get a pumpkin in Fall! ##💎💎"
Cheryl Tallyn	Franklin, TN	2020-08-24	"We need to preserve our historic, rural landscape"
Donna Montague	Franklin, US	2020-08-24	"Developers only think of MONEY"
Haylee Hall	Nashville, TN	2020-08-24	"This shouldn't pass as homes will be in an area that WILL flood."
June arnold	fairview, TN	2020-08-24	"I want To!"
teri copeland-wilson	Franklin, US	2020-08-24	"I am signing this because I highly oppose rerouting or restructuring the Historic River to make way for 800 more homes in this area and doing it for the sake of having to build on land that I have seen flooded. No one knows what this will do for the hundreds of homes that are downstream from there. I oppose this because I live here and plan to live here until my life is over. Please don't allow this aggregious plan to happen and ruin the beauty of this side of Franklin and cause traffic headaches we already have worse."
Beth Stark	Franklin, TN	2020-08-24	"too much development already in this area. leave the green spaces alone."
Nancy Lemon	Franklin, TN	2020-08-24	"We need to preserve the floodplain and the last rural area of our county!!!"
Cindy Whitt	Franklin, TN	2020-08-24	"I want to protect the Harpeth River!"

RE: Envision Franklin Plan Amendment Proposal for higher density for Brownland Farm on the Harpeth River- item 4. Comments and input on the floodplain alteration proposal to be presented

Dear Franklin Planning Commission:

On Thursday's Planning commission agenda is the proposal to amend the Envision Franklin plan for higher density residential and neighborhood commercial design concepts for portions of Brownland Farm. This proposed plan amendment higher density concepts than the plan's current Conservation Subdivision concept is based on a significant alteration to the natural floodplain and floodway channels in this unusual bend in the Harpeth that creates unique constraints for traffic, flood management, and public safety. There are complex issues in this proposal for this area of the Harpeth which is reflected in this proposal being deferred two times since June. We appreciate the time the city's planning and engineering staff have spent to provide us with input on the review process. We have also reached out to the community and to state and federal experts on floodplain alteration review processes to understand this proposal. We also appreciate the time that Kevin Estes at Land Solutions, Barge Design Solutions and Greg Gamble provided in late July to discuss their floodplain alteration concepts with us.

With this letter we would like to provide the Planning Commission with our thoughts, recommendations, and information that we have provided to the city's staff that we hope will be useful in the city's deliberations on not just this proposal, but the larger issue of floodplain management and flood resiliency planning.

You can also see more photographs, video, and documents that are referenced here on our [web site page](#).¹ I have also provided some of that information here to make it easy for you to choose the format your prefer.

In summary with details below, Harpeth Conservancy believes that this Envision Franklin plan amendment for higher density for this flood constrained river bend needs to be turned down. We support the staff concerns for traffic, public safety and emergency response because of the environmental constraints of the river and Hillsboro Road and lack of other access for people to get in and out of this area. This area was extensively flooded in 2010 including on Hillsboro Road. The maps from FEMA below show clearly that this area is completely surrounded by floodway which leaves the higher ground in the bend of the river isolated as an island until access out of flood waters is provided from the West as well as flooding issues along Hillsboro Road are addressed.

¹ <https://harpethconservancy.org/uncategorized/major-issues-with-high-density-development-proposal-in-harpeth-floodplain-up-for-approval-by-franklin-planning-commission/>

In addition, the floodplain alteration proposal is extensive and involves filling one of the floodways and extensive cuts along the main river that will substantially change the natural floodplain. During the joint BOMA and Planning Commission meeting in July when the developer/applicant presented an overview of this proposal, Planning Commissioner Roger Lindsay noted that this could be the first significant floodplain and floodway cut and fill proposal the city has seen in recent times. The process of the state and federal FEMA review of this proposal will take several months and will involve outside expert review from the engineering firm, AECOM, that did the work with the federal agencies to update the FEMA floodplain maps for the Harpeth. As of last week, we understand that the developer's floodplain alteration proposal has not been submitted to the city staff. This submittal starts the formal state and federal review process.

A proposal for this bend in the Harpeth for Brownland Farm and any portion of Christ Community Church needs to be resubmitted after all of the state and federal review processes for the floodplain alteration proposal are completed. We understand that there are more of these floodplain alteration proposal around the state each year and that the expert review process has been valuable in revising and correcting problems in the proposals. It doesn't seem appropriate to consider a plan amendment or approve a plan following the city's current plan that would establish entitlements that can not be used if the floodplain alteration proposal they are based on have not been reviewed and approved by the state and national FEMA review process.

Specific Points on the floodplain alteration proposal:

Caption: This map shows the current floodplain in Harpeth River bend where Brownland Farm is located. There are TWO floodway channels that cut across this bend. One is west of Christ Community Church and Hillsboro Road. Another floodway channel cuts over the entrance to Brownland Farm and flows behind the church. See photos and video below from the May 2010 flood.

The rezoning proposal is based on a dramatic change in the Harpeth river's large natural floodplain and high flood channels. Brownland Farm and Christ Community Church are situated on this large bend in the Harpeth. From the FEMA map below it appears to more than 75% of the land in the bend is in floodplain and cut off by two high flood channels, called floodways. The 100-year floodplain (dark gray) and floodway channels (hatched area in dark gray) flow over Hillsboro Road, which is the only way out of this bend in the river. During the historic May 2010 flood, floodwaters covered Hillsboro Road and flooded much of the river bend and the farm entrance (see photos below).

Caption: The 100-year floodplain is defined as having a 1% occurrence every year. These events can happen every year and more than once a year though. The floodway indicates where the main channel of swift water is. The wavy lines are FEMA determined elevations.

This map from the developer's presentation shows the two floodway channels that cut off the bend in the river. Hillsboro Road is on the right running North to South. The pink band is Mack Hatcher Parkway. There is no access to this bridge for any development in the bend according to the staff report.

1. The proposed reduction of 25% of the floodplain runs counter the Envision Franklin's Conservation Design concept which calls for limited disruption in these areas.

The drastic floodplain alteration not only proposes filling the floodway, but also to remove 64.2 acres from the floodplain. The reduction of over 25% of the floodplain on the property goes counter to the city's Conservation Design Concept that applies to all the floodplain in Envision Franklin. The Conservation design concept "contemplates as little development as possible in order to protect sensitive land and environmental features" such as floodplains. "The preservation of floodplains has a direct public-safety purpose and helps to minimize property damage during periods of flooding. Disruption in any Conservation area should be limited to preserve the function, form, and character of the area." (p. 32).

Caption: The left image is the Envision Franklin plan of Conservation Concept design for the floodplain and Conservation Subdivision concept (light green) on those small portions of Brownland Farm and the church not in the floodplain. The plan amendment proposal is for Multi-family Residential (orange) and Neighborhood Commercial (red) which are over one of the floodway channels proposed to be filled.

These two maps below are from the developer's presentation to show the existing and proposed floodplain and floodway changes. The Existing Floodplain map does NOT show the 100-year floodplain (green) or floodway (blue) going over (covering) Hillsboro Road as the FEMA map shows (most of the area inside red oval area). This map does not seem to be a correct representation of the FEMA maps of the existing conditions.

EXISTING FLOODPLAIN

PROPOSED FLOODPLAIN

2. Harpeth Conservancy supports the significant concerns raised in the staff report with traffic, safety, and emergency response since the only way in and out of this area is on Hillsboro road which is blocked with floodway and 100-year floodplain flows.

Very importantly for public safety, there is no way out of this bend in the river across the Harpeth to the west. For public safety reasons alone this plan amendment proposal needs to be turned down. Any development proposal that follows the city's current Envision Franklin plan needs to wait until the state and federal reviews of any floodplain alteration proposal is completed.

The city engineering staff were interested in photos and video of the May 2010 flood that would corroborate the FEMA maps. We asked folks in the community who helped to find these images and video which were found on various people's facebook accounts.

The photos above are at the site on Hillsboro Road and Poteat Place where the floodway called the "East Split" on the FEMA map covered Hillsboro Road. There is also a [video](#) linked on our web site that shows the swift moving water during the flood over Hillsboro Road.

The photos below show the extend of floodwaters in the bend on Brownland Farm and the church property. The first photo is at the Brownland Farm entrance at the “West Split” floodway. The next two are from Brownland Farms in the middle of the property. The last is of the Stewards garden behind Christ Community Church.

3. There are two Fundamental Differences Between the Floodplain Alteration at Waters Edge and what is proposed for Brownland Farm.

- Waters Edge’s floodplain alteration does not appear to have filled floodway
- Brownland Farm is surrounded by floodway channels. Waters Edge is not.

The big difference is that Brownland and Christ Community Church are situated on a bend of the river that is on an island surrounded by the floodway. Waters Edge is situated with higher slopes on the other side of Carothers parkway. The slide from the developer’s presentation is below and shows this distinct and important difference.

4. An extensive Floodplain and floodway alteration plan just for the Brownland Farm property is too short sighted and too narrowly focused because of the naturally large and mostly unaltered floodplain, the river's meandering natural channel, and the existing roads and developments in the area.

While FEMA minimum requirements are that alternations not increase the probability of flood risk in the 100-year floodplain, this will not guarantee that downstream properties will not see more flood water or not flood more often. For example, the Brownland Farm floodplain alteration plan does not help to reduce flood risk downriver in Fieldstone Farms or Cottonwood that were built under earlier requirements and floodplain extent. Many homes are now in the 100-year floodplain that were not when built. A key reason is that FEMA flood models are based on historical data and do not include the increase in intense rain events from climate change that is affecting our region (see below). Floodplain models also are predicting based on one rain event, not several back to back.

Also though this development proposal includes the Eatherly property where one of the floodway channel flows in front of Monticello, the floodplain alteration proposal does not appear to reduce flooding in Monticello along Jefferson road or Monticello Road. This floodway channel, the "East Split," runs parallel to and over Hillsboro Road as happened during the May 2010 flood. As discussed above, the current FEMA map shows the floodway and 100-year floodplain covering Hillsboro Road. It is vital for any high-density residential development in this area of the Harpeth to have two accesses with one not being Hillsboro Road.

These photos below are aeries of the extensive flooding to nearby residential areas. From top to bottom are Fieldstone farms, Fieldstone Ball park next to Christ Community Church, and Mack Hatcher Parkway crossing the Harpeth looking west to Hillsboro road. (sewer plant is left).

The May 2010 Historic Flood was a Huge Wake-Up call to the greater Nashville Region

The May 2010 flood was caused by two intense rain events that set new historic records for the Nashville region. The entire Harpeth River flooded with the all-time rainiest day and third rainiest day coming back to back on the weekend of May 1 and 2. We have details of various analyses on [our web site](#).² The floodplain maps were updated for the entire Harpeth several years ago after the May 2010 flood. However that work and FEMA models used to propose changes to the floodplain DO NOT include projections of increased rainfall intensity that is occurring in this area from climate change. Nor do FEMA requirements incorporate targets to reduce downstream properties from the 100-year floodplain. New flood prediction models, called [Flood Factor](#), received national coverage (see story in [the New York Times](#))³ and front page coverage in the [Tennessean](#)⁴ in early July this year with their focus on how to incorporate climate change predictions into FEMA's work.

The city has also updated and added important additional requirements for new construction, so homes are elevated above flood levels, and additional requirements to account for some of the increased flood volume. However, the city does allow cut and fill in the floodway and floodplain. With the intent of Envision Franklin to preserve the function and form of floodplains by calling for limited disruption, the city will want to review how to limit the use of cut and fill in the floodway and for what purposes, such as limiting it to rectifying an existing man-made flooding condition.

But there needs to be an intentional effort to have new development upstream in a floodplain reduce the number of existing properties in the floodplain that now have increased flood risk from the pattern of prior development and earlier requirements. Just like the city and county requires new development to provide funds through various means to cover costs of roads, schools, sewer and drinking water upgrades, any floodplain alteration plan needs to specifically analyze how it will reduce existing flood risk that is in this high density residential area of the Harpeth. As a community we can development these goals and specific requirements to protect current residents and property owners and provide ways for possible public investment that is complemented by private investment from any new development.

Other Residential Proposals nearby highlight the need for a special plan for the last rural and historic area of Franklin bounded by the Harpeth and West Harpeth north of new Highway 96 West

At the same time as this plan amendment proposal for higher density development for Brownland Farm is the proposed annexation of the 58-acre Campbell property for a residential subdivision in the middle of rural land. The proposal is adjacent to the Gentry and Short farms, both TN Century Farms, and two home sites listed on the National Register of Historic Places that are north of Highway 96 West near the West Harpeth. We support the Heritage Foundation's recent recommendation as well for the city to not annex the Campbell property at this time.

² <https://harpethconservancy.org/programs/clean-water-protection/retrospective-on-may-2010-flood/>

³ "New Data Reveals Hidden Flood Risk Across America," New York Times, June 29, 2020.

⁴ "What's the Real Flood Danger? New data shows risks across Tennessee," Tennessean, July 3, 2020

Both of these development proposals highlight the need for a special plan for this last rural area of Franklin. This Northwest quadrant, from Brownland Farm in the East to Gentry Farm in the West north of highway 96 West, contributes greatly to the historic agricultural heritage of the city and county. As several aldermen noted in a recently discussion on the major thoroughfare plan for this rural area, “this area needs a different feel” from West Haven and “we need to go back to the drawing board on how to get this area developed more in keeping with the area North of 96.”

This updated plan would honor and invest in the historic and rural character that includes the deep history tied to the equestrian industry in Franklin, Williamson county and the region. This special plan also needs a specific floodplain risk reduction and resiliency plan that addresses current made-made flooding and reduces the risk to current property owners from flooding in the city and county downstream of downtown Franklin.

This map shows the city’s Northwest quadrant that is bounded by large floodplains of the West Harpeth (left) and main Harpeth.

The Equestrian industry is important to Franklin and Williamson County’s heritage and current economy

HC participated in and supported Williamson County’s recently adopted Williamson2040 plan that has a key goal to preserve the rural character of the county. Infrastructure costs in terms of schools and roads were studied in this plan and by others in this region. A key recommendation as well is to work on a rural agricultural plan that prioritizes rural land uses such as agri-hoods, small farms, the equestrian industry and more.

The equestrian industry is a major part of this area’s history and current culture. The city invested in this with the purchase and creation of Franklin’s Park at Harlinsdale Farm. On Brownland Farm, Cissy Anderton and her family created and have run a renowned horse show business for nearly 60 years. This includes the high caliber Music Country Grand Prix show jumping competition that is also featured charity fundraising event for Saddle Up. A 2010 [Williamson Herald](#) story notes that \$30 million is generated in local revenue from horse

industry, much from Brownland Farm.⁵ It is important for the city and county to consider how both land use plans and other programs can incentivize this important industry to the local economic economy that has little burden on infrastructure.

An special plan for the NW quadrant for Envision Franklin could focus on how to support the agricultural and lower density uses of this area, which will translate into much reduced cost in infrastructure needs from roads, schools, sewer and drinking water expansion, and public safety risk from flooding. The 2018 study by Dr. Sims of the U. of Tennessee on the loss of farmland across the region highlights the economic value to integrating into land use plans ways to prioritize low density and agricultural based land uses.⁶

A Floodplain Resiliency Plan is Needed for this area and likely in others

We would like to work with the city, county and agencies on a floodplain resiliency plan for the Harpeth River and West Harpeth river from downtown Franklin to Highway 100 Davidson county line as a key need for any future development in the rural Northwest quadrant of Franklin. A floodplain resiliency plan would have a goal to reduce property in the 100-year floodplain in subdivisions like Rebel Meadows, Fieldstone Farms, Monticello, Cottonwood, River Landing and others that were designed under prior rules and conditions. A floodplain resiliency plan needs to include climate change predictions to prevent future flooding, address current flooding caused by man-made conditions (such as roads, bridges, culverts and older development requirements), and protect the natural river floodplain by limiting cut and fill. Designing resilient communities is planning for the future and is a major lesson from the May 2010 flood especially as this region continues to grow.

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Greetings and Thank you for your time.

I appreciate your reading my thoughts regarding making an amendment to the Envision Franklin Plan in order for the Brownland Farms Neighborhood Development to happen.

I have lived in Franklin for 17 years. I got married in the downtown Franklin Historic Cumberland Presbyterian Church and had our reception at the Factory. But I grew up in West Tennessee, in Jackson TN. I remember growing up and making the "big trip" to the "big city" of Nashville. Every so often we would make a detour and visit what we called "the sweet, small and intentional town of Franklin TN". Here is what we thought of Franklin as visitors: the town where everyone loved horses, the town where antiques and green space were appreciated, the town where it seemed as though everyone knew one another, the town where you could slow down and take a look around. My family loved visiting here as a kid and teen.

When it came time for me to make adult decisions and think about future family and planning ahead, Franklin was just the place for our family. We didn't want a town that reminded us of "just another suburb" where it would one day explode and every corner would look the same. We have owned and lived in two different homes in Franklin knowing that there would be *limited growth*. The 2017 Envision Franklin seemed to honor this thought - controlled growth.

Here are my concerns about Brownland Farms becoming a large neighborhood packed full of homes:

- Traffic - we don't want to become Atlanta! Traffic on Hillsboro is already an issue and still will be with the Mack Hatcher work
- Traffic evaluation by the builder/developer doesn't make sense
- Harpeth River preservation - Let's preserve, maintain and respect our beloved Harpeth
- Flood Plan - where does the water go.....the evaluation for floodway and floodplain feels uncertain and scary to me. I have serious and grave concerns about water
- Envision Franklin - the neighborhood plan does not meet the standards and vision of what we adopted in 2017
- Schools - Franklin High School will be at max capacity with a neighborhood of this size. FSSD is known for its small and personal take on education it is a treasure to this city why would we want to overload it
- Affordable Housing - nothing affordable will exist in this neighborhood. This issue is important to the citizens of Franklin! Including me! This development will be 1.7 miles from the beloved Hard Bargain Neighborhood. It feels contradictory and counter productive to the working class citizens of our town to put in \$800,000+ homes there! And a lot of them!!
- Cost - cost of new schools, new roads, etc. Yes there will be additional property taxes from the residents of these homes however - consider the cost for surrounding neighbors. First time flooding occurs - our insurance rates go up!
- Quality of Life - surrounding areas, neighborhoods and traffic flow suffer from this development. It is the "trickle down effect". Years and years of construction, road work, and eye sores then will result in a long term traffic issue along hillsboro road
- Other Ideas - has it been looked into if there is any other business interested in the Brownland Farm property who has a love of horses and horse shows? Has there been research done to consider other options for the property that benefit the City of Franklin as well as simultaneously honoring the Envision Franklin Plan? Let's keep looking. Let's find a way for the Brownland Farm Family to financially benefit from their sale as well as create a more appropriate use of the land for all of Franklin.

Can we work together to honor and uphold the much vastly approved and mutually agreed upon plan to maintain controlled growth as well as honoring the personality and charm of Franklin that makes us Franklin?

Thank you for considering my heart. Our family loves Franklin and wants it to be better - BIGGER DOES NOT ALWAYS MEAN BETTER.

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Franklin Planning Committee:

I'm writing to express concern regarding the proposed Brownland Farms development. The Lynwood Branch is in my back yard in the Hillsboro Acres subdivision. Attached is a picture from my back door during the 2010 flood. I understand the developer's claim to increase flood plain capacity, but I'm not sure the down stream effect of this project is fully known. In addition to the Fieldstone Farms and Cottonwood neighborhoods, I ask that you also consider the Lynwood Branch that runs through Meadowgreen and Hillsboro Acres in the evaluation. I wonder if the Brownland Farms property is one of the last and best chances we will have to address, in a major way, the flood risk on both sides.

I'm also concerned about the density and traffic that will be caused by 700 new homes in this area. Cut through traffic in Monticello, Spencer Creek and Brookside Drive (near my home) is sure to be a problem (it already is).

Finally, please consider what the best use of this land would be to make Franklin an even better place to live and work. Do you think this proposal is an improvement to the Envision Franklin plan? I don't know the answers, but I don't think it's 700 homes and risky (or even status quo) modification of the flood plain.

Thanks for your consideration.

Planning Commission, I understand Action is coming up Wednesday on this property. After seeing proposed maps of how the floodplain will be altered I have great concern for what will happen to the property of those of us who live downstream on the Harpeth River. I live in Fieldstone Farms and I certainly don't need to describe what happened here 10 years ago. My property on Essex Park Circle is on the Harpeth River. The latest floodplain maps show that the back of my property is in the floodplain. I urge the MAOB to not approve any development plain that does not completely pass muster for not endangering property downstream.

Thank you,

Looking for your help to stop the Brownland Farm development. I live on Hillsboro Rd and can hardly get out of my driveway now I can't imagine what it will be like with that many homes being added so close to downtown Franklin. Not to mention environmental concerns, flooding, and concerns for how it will affect the Harpeth River.

Vote 'No' to amend Envision Franklin. This was a promise made to the people of Franklin and Williamson county. Many of us purchased homes because of it knowing this community was to remain smaller.

This Envision Franklin is a promise to me that means:

- We would not have the traffic issues of Nashville/ Atlanta
- We will maintain some of those things that make this one of the best small towns in the country
- Continue to have some of best schools in TN
- Make an amazing place to live.

Here are some specific reasons on why I am worried.

Traffic:

- Even with the mack hatcher work, traffic will still be bad.
- No way for high schoolers to get to Franklin High. That traffic is TERRIBLE in the AM
- No way to get to franklin high school games. That is already a very long wait.
- Adding more stop lights on Hillsboro road will make this even worse.
- More traffic making it difficult to get to downtown franklin.

Schools:

- Capacity is at 25 students per classroom. NONE of us want that. We want to keep it well below that. The developer says we are under capacity but our children are walking across a parking lot to get to their classes! We are over capacity of a relatively new building.
- Limited parking at franklin high
- Do we have enough schools? Who is going to bear the cost of these new schools?

Infrastructure

- Yes there will be new property taxes as a result of this but the cost to expand roads, build more schools. The burden is on the surrounding communities. In return they will have more traffic and more crowded schools. This is not a fair trade.
- This allows the developer to make money and leave the true cost of these homes to the other community members.
- Harpeth River changes will impact many communities downstream from this development. First time this place gets flooded I do not want to know what will happen to my insurance rates!

This proposal offers NO benefit to Franklin city and Williamson county. It is a cost to the hard working tax payers and will negatively impact our children while increasing traffic dramatically.

I am disappointed this is even being considered. I would encourage the city council to not even entertain any revisions to Envision Franklin in the future. These are promised to the people of Franklin and Wiliamson. Considering Envision Franklin is only 3 years old it is highly concerning this is being discussed.

Kind regards,
Brent

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

I've been following the proposed Brownland Farm development and have been a little over-focused on the hullabaloo over density/traffic woes. On that, I have no issue. I would welcome more homes, affordable homes, in the city perimeter. The floodplain issues are a COMPLETE NONSTARTER for me. While this is a city project and I live outside the city boundary, the flood plain issues I have recently researched will affect people, homes, and livelihoods well outside the city boundaries. I am adamantly opposed to a waiver of any flood ordinance after the damage and heartache we all experienced in 2010.

Respectfully,

Chip Higgins

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Dear Planning Commision. Mayor Moore and Aldermen:

Our family has great concern over the proposed development on the Brownland Farm property.

The proposed plan is for a high density development that goes very much against the Envision Franklin Plan. Given that this plan was carefully crafted with citizen input, please do not allow this development to be given a pass on following the guidelines set forth in it.

The proposed property sits mostly in a flood plain. Given we live downstream from it on the banks of the Harpeth River, in a neighborhood overwhelmed by flood waters just 10 years ago; we are greatly concerned about any notion to override the current FEMA guidelines on the property. Brownland Farm itself sat underwater 10 years ago. Allowing such a high density development is not only irresponsible but ultimately unsafe.

On top of all of this, please consider the traffic implications. Two traffic lights are proposed on Hillsboro Road. A road already overrun with cars and about to be impacted even more by the Mack Hatcher extension.

Please consider Franklin High School. 800 homes will bring even more students to our already over-crowded high school.

Franklin is beautiful for many reasons, our rural land being one of them. Please consider a long-term plan that assures the Brownland Farm and Gentry's Farm are protected from over-development. Envision Franklin makes it clear that the citizens you represent desire our farm lands be preserved. It makes it clear we do not want high density developments such as this one.

Thank you for your service to our community.

Best regards --
Chris Chaney

Dear Planning Commission - I have lived in Monticello since 1997, so I have first hand experience of the 2010 flooding. My point today is to ask you to deny the rezoning request of Brownland Farm from agricultural to high density development. I am very concerned that the proposed development could have devastating flood effects on my neighborhood, Cottonwood and Fieldstone Farms.

I support what some Aldermen have already suggested that we need to preserve and protect the West Harpeth region which is the last rural area of our city that was not addressed in the Envision Franklin Planning Process.

Thank you for your consideration.

Hello Eric, Vernon and the Planning and Engineering staff team,

I meant to include everyone in one fell swoop on our email and letter to the planning commission and BOMA regarding our input on Brownland Farm. But after hitting the send button I realized that I hadn't included any of the city staff and leadership team! Sorry about that!

The Envision Franklin Plan Amendment that is based on an extensive floodplain and floodway alteration proposal for Brownland Farm is a complicated one. Thank you all for helping us the many aspects of the city's review process, especially with regard to the floodplain proposal. Please continue to let us know how we can help you with your deliberations.

Subject: Input on Plan Amendment and Floodplain alteration proposal for Brownland Farm on Harpeth-- item 4 on PC agenda for August

Dear Franklin Planning Commission
Franklin Board of Mayor and Aldermen,
Eric Stuckey, Vernon Gerth
Planning and Engineering Departments

The Harpeth Conservancy has been interested in the floodplain alteration proposal that is the foundation of the Plan Amendment proposal for higher density concepts for Brownland Farm that lies in a bend in the Harpeth River just north of downtown Franklin. This proposed plan amendment is based on a significant alteration to the natural floodplain and floodway channels in this unusual bend in the Harpeth that creates unique constraints for traffic, flood management, and public safety. There are complex issues in this proposal for this area of the Harpeth which is reflected in this proposal being deferred two times since June. We appreciate the time the city's planning and engineering staff have spent to provide us with input on the city's review process. We have also reached out to the community and to state and federal experts on floodplain alteration review processes to understand this proposal. We also appreciate the time that Kevin Estes at Land Solutions, Barge Design Solutions and Greg Gamble provided in late July to discuss their floodplain alteration concepts with us.

Please find attached our letter to the Planning Commission with our thoughts, recommendations, and information that we have provided to the city's staff that we hope will be useful in the city's deliberations on not just this proposal, but the larger issue of floodplain management and flood resiliency planning. Also here is a [link to the page on our web site](#) with more photos, video and documents that are referenced in this letter as well.

Harpeth Conservancy believes that this Envision Franklin plan amendment for higher density for this flood constrained river bend needs to be turned down. We support the staff concerns for traffic, public safety and emergency response because of the environmental constraints of the river and Hillsboro Road and lack of other access for people to get in and out of this area. This area was extensively flooded in 2010 including on Hillsboro Road. The maps from FEMA below show clearly that this area is completely surrounded by floodway which leaves the higher ground in the bend of the river isolated as an island until access out of flood waters is provided from the West as well as flooding issues along Hillsboro Road are addressed.

The first photo above is at the site in Monticello at Hillsboro Road and Poteat Place where the floodway called the “East Split” on the FEMA map covered Hillsboro Road. Across the street is Christ Community Church. There is also a [video](#) linked on our web site that shows the swift moving water during the flood over Hillsboro Road. The staff asked us to see if we could find images on the ground of flooding along Hillsboro Road that corroborates the FEMA maps. We reached out to people in the community who found numerous images on facebook. The other two photos show the second floodway that starts at the Brownland Farm entrance and the extensive flooding on the farm’s show grounds.

The floodplain alteration proposal is extensive and involves filling one of the floodways and extensive cuts along the main river that will substantially change the natural floodplain. During the joint BOMA and Planning Commission meeting in July when the developer/applicant presented an overview of this proposal, Planning Commissioner Roger Lindsay noted that this could be the first significant floodplain and floodway cut and fill proposal the city has seen in recent times. The process of the state and federal FEMA review of this proposal will take several months and will involve outside expert review from the engineering firm, AECOM, that did the work with the federal agencies to update the FEMA floodplain maps for the Harpeth. As of last week, we understand that the developer's floodplain alteration proposal has not been submitted to the city staff. This submittal starts the formal state and federal review process.

We understand that there are more of these floodplain alteration proposals around the state each year and that the expert review process has been valuable in revising and correcting problems in the proposals. It doesn't seem appropriate to consider a plan amendment that would establish entitlements that cannot be used if the floodplain alteration proposal they are based on have not been reviewed and approved by the state and national FEMA review process.

The proposed floodplain alteration concept includes removing 64.2 acres from the floodplain based on the applicant's presentation in the August Planning Commission package. The reduction of over 25% of the floodplain on the property goes counter to the city's Conservation Design Concept that applies to all the floodplain in [Envision Franklin](#). The Conservation design concept "contemplates as little development as possible in order to protect sensitive land and environmental features" such as floodplains. "The preservation of floodplains has a direct public-safety purpose and helps to minimize property damage during periods of flooding. Disruption in any Conservation area should be limited to preserve the function, form, and character of the area." (p. 32).

The May 2010 flood was caused by two intense rain events that set new historic records for the Nashville region. The entire Harpeth River flooded with the all-time rainiest day and third rainiest day coming back to back on the weekend of May 1 and 2. We have details of various analyses on [our web site](#). The press coverage of the May 2010 flood has extensive aerial footage of the flooding of residential sections in Monticello, Fieldstone Farms, Cottonwood and River Landing. We have photos of the flooding in this bend in the river on the farm and church as well as these aeriels from the press.

The floodplain maps were updated for the entire Harpeth several years ago after the May 2010 flood. However that work and FEMA models used to propose changes to the floodplain DO NOT include projections of increased rainfall intensity that is occurring in this area from climate change. Nor do FEMA requirements incorporate targets to reduce downstream properties from the 100-year floodplain. New flood prediction models, called [Flood Factor](#), received national coverage (see story in [the New York Times](#)) and front page coverage in the [Tennessean](#) in early July this year with their focus on how to incorporate climate change predictions into FEMA's work.

The city has updated and added important additional requirements for new construction so homes are elevated above 100-year flood levels and additional requirements to account for some of the increased flood volume. However, the city does allow cut and fill in the floodway and floodplain in its stormwater ordinance. With the intent of Envision Franklin to preserve the function and form of floodplains by calling for limited disruption, the city will want to review how to limit the use of cut and fill in the floodway and for what purposes, such as limiting it to rectifying an existing man-made flooding condition.

At the same time as this plan amendment proposal for higher density development for Brownland Farm is the proposed annexation of the 58-acre Campbell property for a residential subdivision in the middle of rural land. The proposal is adjacent to the Gentry and Short farms, both TN Century Farms, and two home sites listed on the National Register of Historic Places that are north of Highway 96 West near the West Harpeth. We support the Heritage Foundation's recent recommendation as well for the city to not annex the Campbell property at this time.

Both of these development proposals highlight the need for a special plan for this last rural area of Franklin. This Northwest quadrant, from Brownland Farm in the East to Gentry Farm in the West north of highway 96

West, contributes greatly to the historic agricultural heritage of the city and county. As several aldermen noted in a recently discussion on the major thoroughfare plan for this rural area, “this area needs a different feel” from West Haven and “we need to go back to the drawing board on how to get this area developed more in keeping with the area North of 96.”

This updated plan would honor and invest in the historic and rural character that includes the deep history tied to the equestrian industry in Franklin, Williamson county and the region. This special plan also needs a specific floodplain risk reduction and resiliency plan that addresses current made-made flooding and reduces the risk to current property owners from flooding in the city and county downstream of downtown Franklin. There needs to be an intentional effort to have new development upstream in a floodplain reduce the number of existing properties in the floodplain that now have increased flood risk from the pattern of prior development and earlier requirements. Just like the city and county requires new development to provide funds through various means to cover costs of roads, schools, sewer and drinking water upgrades, any floodplain alteration plan needs to specifically analyze how it will reduce existing flood risk that is in this high density residential area of the Harpeth.

We would like to work with the city, county and agencies on a floodplain resiliency plan for the Harpeth River and West Harpeth river from downtown Franklin to Highway 100 Davidson county line as a key need for any future development in the rural Northwest quadrant of Franklin. A floodplain resiliency plan would have a goal to reduce property in the 100-year floodplain in subdivisions like Rebel Meadows, Fieldstone Farms, Monticello, Cottonwood, River Landing and others that were designed under prior rules and conditions. A floodplain resiliency plan needs to include climate change predictions to prevent future flooding, address current flooding caused by man-made conditions (such as roads, bridges, culverts and older development requirements), and protect the natural river floodplain by limiting cut and fill. Designing resilient communities is planning for the future and is a major lesson from the May 2010 flood, especially as this region continues to grow.

Sincerely,

Dorie Bolze

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Hello Paul, Jimmy, Lance, and Shanna,

I am also copying Emily, Andrew and Eric from planning in this email so they have the email chain I have sent you all from yesterday regarding the floodplain and floodway proposal the developer is proposing for Brownland Farm. Thank you Jimmy for answering my questions on the process and what the city has received to date. That is very helpful. Your email that provides answers is below so everyone can see the email chain. Also, I had Shanna McCoy's email incorrect. UGH! I also decided to include Floyd Heflin at Williamson county because I think this might be of interest to both the city and the county with regard to future development in the NW quadrant of the city that is bonded by the Harpeth and West Harpeth.

The complex floodplain/floodway cut and fill proposal that Kevin Estes is proposing/contemplating with his rezoning proposal for Brownland Farms raises a broader issue that I wanted to touch on here as an initial idea. The Brownland property and the nearby area has some serious floodway/floodplain constraints that also affect traffic and emergency response. Also, just down river is Fieldstone Farms that was designed under older floodplain rules and information. Then just around the bend after the confluence with the West Harpeth is Cottonwood, in the county that was designed and built even before Fieldstone Farms. Homes in both of these communities are now in the 100 year floodplain that were not when built.

There is another proposed residential development under consideration on the Campbell property next to the Gentry farm that is up for annexation consideration. This and the Brownland Farm proposal beg the question, as some aldermen noted last week during the work session discussion of the major thoroughfare plan, that it is time to relook at the vision for this region of the city/county.

An updated vision of growth/development in this area also needs a floodplain plan, if you will, that both incorporates projections of future risk from increased rainfall events and a plan to reduce the number of residences in Cottonwood, Fieldstone Farms, Meadowgreen, Monticello, Rebel Meadows and others—existing residences/commercial- that are now in the 100 year floodplain. Such a plan would then provide the framework for development in this quadrant so that overall there is a reduction in current flood risk for existing development in this area of the Harpeth/West Harpeth floodplain. Another way to look at this, is that a “no-rise” doesn't reduce existing risk, it is all based on probability and historical data, and the FEMA work doesn't include future projections. But we all as a community could do this and there are people and agencies and experts that would be interested in this.

I don't know if you all saw the July press on the [First Street Foundation flood factor](#) study. It is fascinating and adds in future risk factors to the FEMA work. We are lucky in this area to have updated work after the May 2010 flood than many communities do not have. I attached the NYT and Tennessean press. Note the section on [environmental factors relevant to this region—the increase in intense rainfall](#).

To clarify on the city's typical approval process that Jimmy touched on below. It sounds like a proposal would go through approval processes prior to final review and approval of floodplain changes—CLMOR/LOMR-F and "no-rise." It seems that this rezoning proposal for increased density that the city's current plan relies on a significant floodway fill and cut. It would seem prudent to wait until the applicant's floodplain changes are reviewed and approved before considering rezoning options. In this instance the cart is before the horse. Since the applicant hasn't yet submitted their floodplain package to the city it seems that their rezoning request is premature and getting way ahead of things.

To wrap up: below are photos and video that people have helped pull together from the May 2010 flood that shows floodwaters over Hillsboro Road. Lance and Jimmy mentioned wanting this to help in considering emergency response and public risk with the high density proposal on Brownland and the flood work the developer is doing.

This video is the best and really shows the serious nature of the floodwaters and challenges for emergency response. Hillsboro Road was entirely underwater near the church. Also there are aerials of Mack Hatcher underwater at the approach to the Harpeth bridge beside the city sewer plant.

<https://www.facebook.com/amy.wolter.9/videos/1436167586030/?extid=WXCeLHYtgtPrpozO>

Here is a blog spot with photos from brownland Farms that weekend since there was a horse show. Look at the image of the high floodway moving across the front drive. That is Hapreth West Split from the FEMA map. (see emails below) <http://nancynickeycurran.blogspot.com/2010/05/franklin-flood.html>

Photos below are as flood waters are receding off Hillsboro Road. Facing south on Hillsboro Road with former Eatherly home and Monticello to the left. This is the Harpeth River East Split as labeled by the FEMA maps.

11 of 30

14 of 28

10 of 30

This photo shows the opposite side of Hillsboro Road from the Eatherly house with flood waters receding off Hillsboro Road into the river where the road is right up at a the hairpin bend at the Christ Community Church north end.

Below is the photos I attached to the emails below. This is during the flood and is looking across Eatherly property in front of Monticello to the church.

Thank you all. Let's talk about what we could do as a community on a floodplain management plan that both reduces current residents that are now in the 100 year floodplain, incorporates some of the Flood Factor projections for increase rainfall intensity, and possibly provides some conceptual outlines of stormwater/floodplain management for different intensity of development scenarios.

Subject: FW: Brownland Farm floodplain and floodway proposal and photo of Harpeth flooding over Hillsboro Road in May 2010

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Hi Paul, Jimmy, Lance and Shanna,

I wanted to send a brief update on my email regarding the Brownland Farm floodplain and floodway revision process the applicant is proposing. I meant to include Jimmy and thought I would resend to all of you.

Also the photo I attached shows the May 2010 floodwaters from Jefferson Dr in Monticello looking toward Christ Community Church. This photo does not clearly show Hillsboro Road flooded completely, though it might have captured that in the right end of the photo where the "harpeth East Split floodway" joins the Harpeth just north of the church property. Sorry about that confusion in my email from earlier today.

Also, I wanted to specifically ask if you all have received the floodway/floodplain revisions that the applicant is proposing. We would like to request that material when you receive it.

I just received an email from Andrew Orr that the Brownland Farm proposal is deferred to Sept, though Greg Gamble wants to present some new information. **We have not received their submittal at this time.**

My email below has details from my meeting with them in late July. They discussed their plans to apply for a Conditional Letter of Map Revision from FEMA. This can take 90 days minimum if there are no additional questions FEMA has for the applicant. Then another 90 days to reply. Also, since this is only conditional it still means the applicant needs to still apply for a final Letter of Map Revision from what I understand. Do you know if they have started this process yet?

They have not started the formal process. It is likely they have done most of the modeling at this point.

Lance and Jimmy explained to me in our June call that your process is to review the application submittal, then send it to Amy Wheeler Miller in the state office for review. My notes say that you all send that to the state office for "no-rise" reviews. Is the "no-rise" review separate from the review for the CLMOR? Does one go through the state and the other through the Atlanta FEMA region IV field office? I believe both will have outside engineering review of the hexraz model work done by the applicant. **Shanna, please correct me if I'm wrong but a "no-rise" goes to the State for review. A CLOMR/LOMR-F goes to FEMA. As far as I know, they plan to submit a CLOMR/LOMR-F to show a change in the floodplain/floodway. This would be a good question for their design team since we have not been sent anything at this time.**

We are very interested in understanding the process and review since this proposal is a major significant change to the floodway channels in this very complex area of the Harpeth. As your staff reports have already noted there are important constraints with Hillsboro Road in relation to the river and these 3 floodway channels that affect emergency access, traffic management, public safety, and more. At the June PC meeting, one of the commissioners, I believe Roger Lindsay, stated that this could be the first significant floodway fill proposal in the city in recent times.

This proposal is to fill the entire Harpeth West split floodway and is asking for higher density re-zonings to cover the eliminated floodway. There is also significant cut in the floodway along the main river along with significant fill to remove most of the Brownland Farm property from the 100 year floodplain. This proposal eliminates almost all of the floodplain in this major natural floodplain for the river. This proposal essentially is to move lots of water volume through the main channel versus using the natural floodplain. It would be hugely beneficial to the city to have the outside expert review of AECOM who worked with the Army Corp on the updated flood models and floodplain/FIRM maps. **I understand that AECOM reviews the CLOMR/LOMR-F as a 3rd party consultant for FEMA. Isn't that correct Shanna?**

With the applicant going through the heavy and expensive lift of a CLMOR, it seems the city might want to wait on final say from FEMA and the state's outside review and final determination, which will take a few months, before approving any rezoning proposals on this property. The proposed concept plan and rezoning relies on this major floodplain/floodway revision so it seems appropriate to see if FEMA's outside experts and internal review of this major change to a recently highly updated floodplain by the Corp after the May 2010 flood is approved.

Could you provide me with a basic outline of how the city's floodplain review process will work with this proposal? Are there two reviews going to happen both via the state flood office and FEMA in Atlanta? **We send the CLOMR/LOMR-F to FEMA and they have the final say in approval.**

Does this proposal wait until the final reviews are completed from FEMA and the state office before it can proceed to PC for consideration? **Historically, we have waited until the site plan stage for the FEMA approval on a CLOMR/LOMR-F. In essence, the developable land takes care of itself at this stage. Meaning, if they cannot appropriately remove lots from the floodplain, those lots are never platted or developed. Regardless of entitlements.**

The floodplain/floodway revision they are proposing is the core to their development proposal. It seems important to make sure the underlying floodplain/floodway work is reviewed by all the outside experts that FEMA at the Region IV and state level use before moving it to Planning commission for vote.

Feel free to call me anytime: 615-479-0181 and thank you for sending the applicant's floodplain related materials as they provide them to the city.

Subject: Brownland Farm floodplain and floodway proposal and photo of Harpeth flooding over Hillsboro Road in May 2010

Hello Lance and Shanna,

How are you all doing? First, thanks to Lance and Jimmy for talking to me back in June so I could get a better feel for the floodplain/floodway revision process that the developer for the Brownland Farm proposal needs to use as well as the city's process.

Back in June, Lance and Jimmy explained that a "no-rise" on flooding will go to Amy Miller at TEMA. I understand from talking to other experts that all of the "no-rise" determinations done in this area of TN are now going to the FEMA Atlanta office to have AEOCOM externally review.

Kevin Estes and Adrian at Barge Solutions were nice to have a detailed meeting with us in late July to go over their floodplain/way analysis and proposal to fill the West Harpeth Split. Below is the current FIRM maps with the cross sections. They stated they will need to get a CLOMR for this as well. Their proposal is based on their analysis that the two high floodway splits are actually not continuously dropping in elevation as the current FIRM maps show below. They explained to me that both had high points in the middle so are not moving significant water. This is a significant change from the latest flood maps that were done in detail after the May 2010 flood.

I was wondering if Shanna had a few minutes to chat in the next few days. I want to understand better how you all will review their proposal and how the planning approval process works while their floodplain revisions and CLMOR application are under review by FEMA which I hear can take 6-9 months. What is it that you all provide in the staff report and recommendations to the PC? When will that be ready before the August 27 PC meeting?

Do you all sometimes recommend waiting on the review from FEMA before PC reviews proposed re-zonings? It would seem that with this significant change in the floodplain and floodway based on a major change in how the Corp's current flood maps show the 3 major floodway paths, that it would be wise to wait before approving rezonings and plans for this challenging section of the river. Also the existing road ways do not offer any other access that is out of flood waters. Also it seems that it would be valuable to consider how the existing repeat flooding in Monticello could be mitigated. I suggested this to Kevin Estes during our call.

Lance mentioned an interest in photos from the flood that could confirm that water went over Hillsboro road. I have attached one that show this occurring during the May 2010 flood where the East Split merges with the river at Jefferson Drive. From our discussion in June and listening to the June and July PC meetings, it sounds like that the city's emergency response team is very concerned about traffic and access during flooding with the proposed increase in residents in this bend in the river. There are quite a lot of unique conditions in this area, aren't there?

Shanna, don't hesitate to give me a call, or email a time that works for me to call you!

THANKS!!

Dorie

Subject: Brownland Farm Proposed Development Concerns

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

We are residents of Monticello subdivision. Contrary to what Gregg Gamble told you at the City of Franklin, Joint BOMA/Planning Workshop on 7-23-2020, we are NOT excited or positive about the proposed development of Brownland Farm. In fact we are highly concerned about several aspects of the proposal. We urge you to deny the proposal to change the 2017 Envision Franklin Plan to allow for higher density on Brownland Farm as proposed by the developer. We urge you to deny their rezoning request.

Our Concerns

1. Cut/fill Floodway and Floodplain - At our July 16, 2020 Monticello neighborhood meeting with the developer, we were told they plan to cut and fill the whole site (92 acres). This was astounding to hear and seems like a monumental undertaking. No one can truly predict how the Harpeth, especially with its bends and loops, would flow during flooding conditions after the cut/fill. In 2010 after floodwaters had subsided some, we drove on Hillsboro road and saw that the entire Monticello section 1 was still flooded with absolutely no access via Monticello road or via Poteet road. Since then, our experience here is that it does not take much for Spencer Creek road near Cheekwood Golf Course to become covered in water. With the cut/fill, we are concerned that a serious flood could further impact Hillsboro Road at the bend of the Harpeth close to Hillsboro Road across from the Poteet entrance to Monticello. Based on

accounts and pictures from others, Hillsboro Road along that area was flooded during 2010. It also looks like overflow could fill the Monticello Creek ravine that runs behind several houses along Poteet.

At about mid-2014, FEMA issued a new flood rate insurance map. This increased the number of properties in Monticello subdivision that are in the 100-year flood zone. The count on the new map was 26 properties. This is just Monticello and does not include surrounding neighborhoods such as Rebel Meadows, Cottonwood, Fieldstone Farms and others that experienced flooding in 2010. The Harpeth River has not changed. So why would FEMA give this developer any type of approval to cut/fill, especially the large acreage that can potentially create devastation for so many families?

The developer has not submitted his plans to FEMA for review. It seems the developer is putting the City Planning Commission in an awkward position by asking for changes to the zoning and the 2017 Envision Franklin Plan before going to FEMA. It is our understanding that a section of the site proposed for development is classified by FEMA as a floodway, which is supposed to be kept free of encroachment. If the City Planning Commission allows the requested changes and FEMA denies the cut/fill in the floodway and the floodplain as proposed by the developer, the developer would have put the City Planning Commission in conflict with FEMA. In that case, would the City Planning Commission revert to the original zoning and the original 2017 Envision Franklin Plan? Also, how would all of this impact the City's eligibility for the National Flood Insurance Program?

2. Erosion and Sedimentation – What impact would the cut/fill process and the final result have on the erosion and sedimentation of the Harpeth River? Sediment is usually a major pollutant on construction sites. With the construction process of breaking ground, clearing the vegetation and cutting/filling the site, the drainage areas would be transformed. It seems that eliminating the floodplain and the floodway as proposed would stop natural dispersion of the river's overflow and instead concentrate the flow so that it would be deeper and more forceful. Wouldn't this cause more significant erosion of the riverbanks? Additional, it seems the construction process itself as well as the resulting change in dispersion of the river's overflow have potential to adversely increase sediment in the river. Sediment can degrade the water quality and impact the biology of the river. Also, wouldn't water treatment for communities relying on the Harpeth River be more costly due to increased sediment?

3. Intense Density and Traffic – The proposed approximate 750 residences, which would include everything from single-family houses to condos, apartments, townhouses and an assisted living facility, would bring a tremendous amount of traffic. As a guestimate we assume 2 cars per household equaling 1500 cars. Add to that the traffic from the proposed office and retail spaces and ballparks. This traffic would be accessing the development only from Hillsboro Road, mainly at an entrance across from Monticello Drive. The developer mentioned another potential access around the church parking lot to the north end intersecting with Hillsboro Road. The traffic density will already be increased by traffic coming from Westhaven and HWY 96 through the new part of Mack Hatcher Parkway. Further, what impact would be added by the Cheekwood Golf Course proposed development and the Grassland Village development concept? This tremendous increase in traffic is a public safety concern as well as a quality of life concern for our neighborhoods. Already accesses from Monticello Road and Poteet Road to Hillsboro Road are safety concerns.

What is the impact on the schools and City services in this area due to the proposed density of the Brownland development? Is there adequate city water and sewer planned?

Is this development appropriate for what has been a bucolic corridor to Franklin? Does this fit the character of Franklin? Our answer to these questions is "no". Our opinion is that this development would destroy the peace and comfort of our neighborhoods and destroy the character of our City.

4. Development of Monticello Section 1 - At our July 16, 2020 Monticello neighborhood meeting with the developer, we were told by the developer of their letter of intent to buy 7 acres at the North end of Monticello Section 1. Their drawing proposed 6 houses (3 of them to be alley houses) and 2 townhouse buildings of 4 units each (aka big houses). 3 houses would be on the North side of the Poteet entrance to Monticello. The townhouse buildings would border Hillsboro Road with parking lots behind them. The alley houses would be behind that development. The development of the townhouses and the alley houses on the South side of the Poteet entrance to Monticello would also require some cut/fill. The South side of Poteet a few feet from this proposed site is where the original old house was which was flooded in 2010. Again, please note that in 2010 both the Poteet entrance and the Monticello entrance were flooded. This proposal also means the townhouses would be front and center to the Hillsboro Road corridor into Franklin.

Our concerns about this development are basically the same as expressed in numbers 1-3 above. They include the dangers to lives and property from floodplain manipulation, the intense density of the project, the traffic, the impediment of safe access to/from Hillsboro Road into Monticello and the peace, comfort and character of our neighborhood and City.

Please turn down the proposal to change the 2017 Envision Franklin Plan to allow for higher density on Brownland Farm as proposed by the developer. Changing the floodplain and filling in the natural floodways is ludicrous. So many efforts have gone into reestablishing the natural beauty of the river, how can this proposal be prudent. The rezoning request also raises serious public safety concerns for traffic, flooding, and emergency response for future residents and the current residents living along the Harpeth. Enough development and traffic. Please say no.

Dear Planning Commission,

I write to express my deep concern in having the Brownland Farm and Gentry Farm areas developed with high residential housing, or even low residential housing. This is a floodplain area and should not be considered for this type of construction. This is one of the last rural and also HISTORIC areas of Franklin that needs to be preserved.

There has been much construction in Middle TN during the last decade and building in flood plain areas is a mistake. Many of the houses build in flood plains have numerous flooding issues. Too many trees that help with storm water and erosion control are cut down during construction which makes the flood plains even more prone to flooding. Also, with weather patterns changing, with increases in storms, building in flood plain areas is downright irresponsible and foolish.

Please help preserve these special, historic and rural areas. PLEASE TURN DOWN THIS REZONING REQUEST.

Best, Heidi

Subject: FW: The Brownland Property

To Our Good Franklin Planners:

Recently, I know the Aldermen and the Planning Commission heard the proposal from the developer for the Brownland property on Hillsboro Rd. As a member of Christ Community Church, my husband and I voted against selling part of our property to this developer. The church vote was 222 for and 116 against---about 1/3 of us. We care about our neighbors who would have to deal with this HUGE development.

The reasons WHY we voted against it :

- *It goes against the carefully researched and established the Envision Franklin Plan which needs to be implemented as is.

- *Because of the traffic problem it would create on the already maxed-out Hillsboro Rd. (People need to get to and from Franklin High and down town!)

- *The possible “flood plain” problem it could cause in the future-even ten years down the road after the developer is gone and has no legal responsibility.

- *The resulting traffic increase on Spencer Creek Rd. going to Mack Hatcher. (Battle Ground Academy traffic is already a challenge during school hours.)

- *The density of 800 residences in that area of Hillsboro Rd. is honestly, ridiculous! It would have to be rezoned and that should never happen.

I know you care and want to hear from us out here. Thank you for giving of your time and effort for the good of our community. Your faithful service is appreciated!

Respectfully,
Starr Beaudoin

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

I am writing to urge you to turn down the proposal to revise Envision Franklin from the applicant interested in Brownland Farm. I first learned about this proposal because my property is within 500' of this project.

I feel this applicant's request to amend the Envision Franklin Design Concept on this site from Conservation Subdivision to a combination of 3 design concepts should be rejected.

This application goes against the long-term vision that the Franklin Municipal Planning Commission adopted.

The thought of 750 homes on 83.3 acres is unacceptable. Greg Gamble explained in the Zoom meeting to affected homeowners 200 single family homes, 150 townhomes and 180 multi family homes for a total resident count of 1600-1700. Then he said that the traffic impact study is not ready. He tried to tell us that Franklin High School would only be impacted by an additional 100 students.

The traffic alone along Hillsboro road would choke the city and county on a daily basis. There are safety concerns for flooding and change to the floodplain.

The developer also indicated there would be a canoe launch and walking trails, but no parking for those using the canoe launch from outside the development. Rizer Point subdivision's canoe launch has been a nightmare for our subdivision and has washed away twice in two years and 100's use this launch during the summer. Cars are parked everywhere. This new development would face the same problems.

Although affordable housing would be included in this development, I wonder how homeowners could bear the homeowners dues associated with everything that is being asked for in this plan.

Please vote no for the revision! Keep the Envision Franklin Plan in place as is!

Thank you for your time.

August 26, 2020

To the City of Franklin Planning Intake,

My family and I have been residents of Franklin since 1998. We moved here when our oldest was about to start kindergarten and we wanted a home in a community that was welcoming and beautiful. Both of my children attended the Grassland school system and graduated from Franklin High School.

We are fortunate enough to have known and lived in Franklin before the aggressive approval of high-density subdivisions, the lack of infrastructure to support these developments, and the lack of planning that seems to only benefit the developers. All of these factors are destroying our rich natural environment, and the beauty that drew us here in the first place.

Living in the Temple Hills area, we are experiencing firsthand the tragic effects of the Stephens Valley subdivision and its direct impact on our daily lives. From our historic roads being torn up by construction vehicles and increased traffic, to ground rumblings from blasting at all times of the day and evening, to the displacement of wildlife and the eradication of the beautiful lands that made this area so special.

And now we see that there is a proposal to destroy the historically beautiful areas of Brownland Farm and Gentry Farm and Old Charlotte Pike East. These areas should be preserved and protected by our planning committees, as you represent the current residents of Franklin, our wishes, our lifestyles and our home values.

As a resident of Franklin for over 20 years, I vehemently oppose the destruction of any more of our historic lands. The past can't be bought, please, protect it.

Respectfully,

Jennifer Worden

Subject: 'NO' to Envision Franklin Amendment & Brownland Farms

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Dear Planning Commission,

I am emailing to express my deep concern for the high density Brownland Farms development and the negative effects it will have on our community. I implore you to vote 'NO' to the amendment of the Envision Franklin Plan.

What is the purpose of the Envision Franklin Plan if it is continually altered to allow developments that it was written to prevent? Please know, I am not opposed to growth but I am opposed to high density developments in the heart of our town. I would love to see development continue, if and only if, it falls within the guidelines put forth.

The Envision Franklin Plan was implemented to:

- Protect our schools and ensure we are some of the best in the nation for years to come
- Control and protect the infrastructure of our town
- Prevent traffic issues
- Protect the integrity and charm of the town we all love dearly
- Control growth by providing regulations for responsible growth
- Bottom line, to make Franklin TN the best place on earth to live!!!

I am concerned about the following:

- Traffic
 - The influx of traffic on that intersection will certainly negatively effect the surrounding communities
 - The additional traffic lights on Hillsboro within such a short span will further add to the ability to easily navigate our streets.
 - During events at Franklin High or Christ Community traffic is currently a struggle. Adding 800 homes will severely effect this even worse.
 - The Mack Hatcher extension will not be effective with this increase in resident numbers. We will be back to square one in a sense.
- Schools
 - Capacity - Time and time again, I have heard the developer mention we are not at capacity. THIS IS A GOOD THING. Franklin at capacity of 25 will NOT provide the teacher to student ratio that makes Franklin schools amazing
 - Wlf we had to add a new school to sustain this growth, where would mitt go and how would we fund that?
 - Events & Parking will be an even bigger issue.
- Our Beloved Town
 - I care deeply about Franklin. The developer cares about his profit.
 - In spite if the “Sales Pitch” given by the developer about the “enhancements” that will be made to make that area better. I believe the opposite will take place when we alter a flood plane / flood way and add that much density
 - In spite of Christ Community voting to sell the land, there is a VERY LARGE group of congregational members that are against the development. It’s is clear the churches interests lie in the monetary gain allowing them to complete their development rather than protecting the integrity of our town.
 - The surrounding communities are speaking out against this because they love our city. Listen to the voices and concerns on Nedxtdoor, Petitions, Christ Community congregational meetings, etc.
 - Harpeth River Impact - In spite of the flood study, the downstream effect form this development could be devastating. The land currently retains that water to prevent another devastating flood event. Regarding that will, inevitably cause a negative impact.

I find it deeply disturbing and insulting to the people of Franklin that this development has even made it this far. The Envision Franklin plan exists for a reason and we need to stop making exceptions for Developers.

Again, I implore you to put a stop to this development by saying NO to what has been implemented to protect us and our town.

Thank you for your time and attention to the matter.

Best Regards,
 Jim Peterson

Subject: Brownland Farm potential development

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Good afternoon,

I am a homeowner in River Landing, and previously lived in Cottonwood since 2002. I have serious concerns about the proposed development of Brownland Farm, as outlined below.

1. Floodplain: My home at 339 Gillette Dr. is within the 100-year floodplain. In the flood of 2010, only the home's crawl space flooded. Any additional structures added to the floodplain upriver from my home will most certainly impact the flow of water in our area. The next flood could cause devastating damage to my home that can be prevented by stopping this development.

2. Traffic: I have children in the school system. I witness first hand the traffic congestion that occurs on Hillsboro Rd when I drop my children off at Grassland Middle School and Franklin High School. The afternoon and evening traffic is even worse. We have hundreds of teenage drivers driving themselves to and from school in a very stressful traffic situation. I can't even imagine the additional congestion that would occur with the addition of 800 homes all accessing Hillsboro Rd each morning and afternoon. Often traffic is backed up in the morning going south all the way to Christ Community Church. Adding 800 or more cars entering the road at that point would create certain gridlock for those of us coming from the north. It currently takes at least 20-30 minutes to travel the 5 miles from our home to school, but could easily become 45 minutes or more.

3. Envision Franklin Plan: The Envision Franklin Plan was created and adopted for a reason and purpose. What is the purpose of adopting a plan if it can be amended and changed just because a greedy developer asks? There is a reason the Envision plan limited this property's use to Conservation and Conservation Subdivision; please do not thwart and betray the original plan's intention. Saying yes to this development sets a precedent to allow other harmful amendments to the Envision Franklin Plan.

Franklin is a unique and wonderful community that has experienced astounding growth over the past decades. However, there comes a tipping point when continued high-density development begins to erode the beautiful landscape and charming atmosphere that all of us enjoy. As you consider this decision, please place the needs and desires of your current residents above the wishes of an outside developer.

I urge you to turn down the proposal to change the Envision Franklin Plan to allow for higher density development at Brownland Farm. Further, I encourage you to develop a special plan for the Northwest city quadrant from Brownland Farm to Gentry Farm that would honor its historic and rural character, as well as prevent increases in floodplain risk to current downstream property owners. Thank you for your time and consideration.

Sincerely,

Julie Smith
339 Gillette Dr.

Subject: Deny proposed rezoning of Brownland Farm property

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Elected Officials, City of Franklin and the Planning Commission:

Our family has lived in the Monticello neighborhood for eighteen years and have lived in Franklin for over 23 years. We previously expressed our concerns regarding certain aspects of the proposed development at the Brownland Farm property and a portion of the Christ Community Church property. We have attached the text of that email below for your reference. Based on recent information that the developer, Land Solutions LLC, is asking the City of Franklin to rezone those properties prior to submitting their plans for reworking the floodplain for the required state and federal FEMA reviews, we are writing again asking that the City of Franklin deny the rezoning proposal so that the proper studies regarding the proposed flood plan alteration can be made.

Our additional concerns include the following:

1. In 2010, flood water covered and closed Hillsboro Road at the entrance to the proposed new development (the intersection of Monticello Rd. and Hillsboro Rd.). There is only one way in and out of the new development and if that area were to flood again residents and businesses would essentially be on an island surrounded by water. This presents serious health, emergency response and safety concerns.

2. There was serious flooding on the South side of Monticello, extending onto Hillsboro Road and along the property running along the front of the neighborhood known as the Etherley property, which needs to be further studied to address exactly how changes to the flood plan, including the filling of an existing floodway channel, would impact this area.

Page 21 of the Envision Franklin plan states the following: *Project design should carefully address the potential undesirable impacts on existing uses, including traffic, parking, circulation, safety issues, light and glare, noise, and other environmental concerns.*

I am asking that the City of Franklin and the Planning Commission follow their own plan and **deny** the proposed rezoning of the Brownland property from the current agricultural zoning designation.

Thank you,

Michael and Laura Smith
106 Poteat Place
Franklin, TN 37064

June 24, 2020 email to Franklin Planning Commission:

Our family has lived in the Monticello neighborhood for eighteen years. Our home is located on the north end of the neighborhood two houses east of the large lot adjacent to Hillsboro Road and within sight of one of the two main neighborhood entrances. We are **writing to you to address our concerns and opposition to certain aspects of the proposed development at the Brownland Farm property and a portion of the Christ Community Church parking lot, specifically a change in design concept.**

The developers have proposed an amendment changing the classification of part of the properties from Conservation Subdivision to "Neighborhood Commercial fronting Hillsboro Rd" and "Multi-Family Residential behind." Doing so would be against both the role and major objectives of Envision Franklin as outlined on page 7 of the plan. Additionally, the proposed amendment does not "demonstrate its need and justification" according to the criteria on page 108 of the plan. Keeping the area a Conservation Subdivision would provide all of the benefits to the development and the surrounding community as outlined in the Envision Franklin plan without the negative impacts of a more dense development.

We oppose the change of the re-classification from Conservation Subdivision for several reasons:

1. First, there are already condominiums, townhomes, apartments and senior and assisted living dwellings as well as business spaces available both north and south of the proposed development. Passing this amendment would result in an addition of 750+ homes, plus businesses, to this area. A lower density Conservation Subdivision development would have a lower traffic impact, maintain the character of the area, and not create a further burden on the schools.
2. If the amendment is passed, traffic volume (which is already high) will increase dramatically. Additionally, adding a four-way traffic intersection with a light at Monticello Road will lead to increased traffic cutting through the neighborhood to get to Spencer Creek Road. This is already a significant problem which we don't think can be remedied by simply adding "traffic calming" devices as the developers suggest. To suggest that the traffic will turn right and get on Mack Hatcher rather than cutting through Monticello (and avoiding lights) is disingenuous.

3. There has been a proposal to build five “big box homes” along the north end of the vacant lot in front of Monticello. In addition to the flood plain concerns discussed below, this design concept does not match any existing homes that we are aware of in the area and would change the look of the area while negatively impacting the scenic approach into Franklin. Single family homes, built on land not currently in the flood plain would be more appropriate.
4. Lastly, although not a part of the current resolution, building this new development would require significant cut and fill to build in what is now in a flood plain. In 2010, while our neighbors to the south had their properties flooded, we watched as the formerly dry gully along our street filled to the brim and moved toward our homes. This gully continues into Monticello Creek on the part of Monticello where they propose that big box homes be built after altering the topography. I am attaching pictures we took during the Flood of 2010. The first shows a red car on Jefferson approaching Monticello Road. You can see the road sign in the background. The second shows a portion of the Monticello property where they propose to cut and fill in order to build the big box homes – the area of Monticello Creek mentioned above. The brick home was demolished, but the small white garage remains. As you can see, both areas are flooded. Altering the flood plain will not alter the volume of water, just where it goes. I would hate for it to impact more structures than it did in 2010.

While it would be nice to have the properties remain untouched, we realize that development is inevitable and are asking that the City of Franklin follow through with the plans articulated in the Envision Franklin Design Concept by opposing the amendment to the plan. We appreciate your time and your continued support of Monticello.

Best regards,

Michael and Laura Smith

Planning Commission:
Please do not allow high density developments to be built in Franklin/ Williamson County.

Currently our schools are packed. Those kids going to Franklin High School already need to walk outside to their classes. We want to keep our classes small to provide our children the best education we can.

Traffic is difficult. Hard to get up and down Hillsboro Road already. I can not imagine adding two more stop lights and thousands of homes!

I am disappointed that there is even a consideration of revising Envision Franklin. We want the planning commission to take a strong stance on these proposals and give a firm no to these revisions. Franklin is a special community please keep it that way!

Kind regards,
Marie

Subject: Brownland Farms Floodplain Alteration Proposal

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Dear Mr. Orr,

As twenty-five residents of Monticello, one of the oldest subdivisions in Franklin, my husband John and I are definitely against the dramatic floodplain alteration proposal of Brownland Farms. This flood plain proposal does not fix any of the flooding issues involved with the purchase of the Eatherly property. We live on Monticello Creek, which was blocked in the 2010 flood at the underpasses and the creek rose 10 feet in six hours. We were blocked in our subdivision except for a one foot overflow over Spencer Creek Road. We literally drove around the whole town to get to CVS store on Farrier Lane at Hillsboro Road to pick up medical supplies. The existing flood issues are still present to this day and are even worse with the rapidity of climate change.

This proposed development affects the whole Grassland area, downtown Franklin business and residents close to the river. In March, the land-use plan was implemented by vote of the Williamson County Commission for "natural resource protection, the careful planning of transportation infrastructure, as they stressed the importance of county and municipalities, the city, coordinating on growth plans." The threat of flood would be the first reason for a much lower density of development.

Traffic patterns increase exponentially, simple math, as 800 residents would have to move on already crowded conditions during busy times, school and work-day routines. The lack of a back exit would be a disaster for the safety of residents during a flood. Franklin Special Schools are located off Hillsboro Road. 40% of students are driven to school by their parents.

The idea of a high school being built in West Haven is a false presentation. According to the future proposed plans by the Williamson County Board of Education, the only proposal on record is for a high school in northwest Williamson County in five years, not West Haven. Franklin High School can accept only 200 more students until it reaches 2,000, its maximum, according to the director of secondary schools.

The fiscal recession does not look good for at least three years. The County is already behind in its infrastructure budget. The Envision-Franklin guideline and zoning rules were written to protect our citizenry from this outrageous dense development. A bad precedent would be in place for the rest of the city development. This area is way too close to the historic district and the downtown area. This is one of the main entrances to our small city. The architectural elements need harmony in design, not a three-story high rise along our entrance. This concept does not fit the area. Hopefully, the wisdom and judgment of this committee will turn down the proposal to change the 2017 Envision-Franklin Plan and develop a plan for the last rural area of the city and protect our beautiful small historic city from urban sprawl.

Sincerely yours,

Nell Henderson

Subject: Brownland Farms

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Good afternoon ladies and gentlemen,

I am writing to you in support of the proposed design for the Brownland Farms on Hillsboro Road. It is important to note, that this is exactly the type of project that should go in that location.

As large tracts of land like this come available, it is imperative that we support comprehensive mixed-use solutions, such as this.

As a resident of Fieldstone Farms, I certainly recognize the positive benefits to this side of town.

With Hillsboro Road and Mack Hatcher, the transportation infrastructure is definitely adequate to support a community of this size.

I know that there is some question about the impact to schools. While this could possibly challenge the Williams County School Board on the districts for their system, as a city, we must consider all infrastructure and realize that a project of this scale and size works best for our overall infrastructure of water, sewer, transportation, and security (police & fire). By allowing communities like this to happen closer in, it reduces so many other infrastructure burdens vs. the alternative of sprawling design.

Because we have created such a great community, people will continue to come. If they are coming, and we are growing, let's grow in a way that respects the land and resources that we have and locate density in such a way that it enhances existing infrastructure. By doing so, it allows us to preserve land further out that would otherwise be scarred by lower density development (needed because people are moving here).

The fact that this developer has demonstrated some creative design solutions through a few different methods, should also be commended. First, through collaboration with the church to develop a better land-use development. This shouldn't be seen as a "land-grab", because the easier way would be to not engage the church. But to engage the church seems to show me that this is a developer who is trying to do the right land design. Secondly, the action of acquiring the Monticello property and creating a park. Again, this is a wise land design decision. Because this design seems to go above and beyond normal development practices to accomplish the desired design, should be acknowledged. (Note, I do not know this developer)

Thanks for your time and consideration.

Thanks,
Scott

Proposed Access Road to Boyd Mill Ave (Consideration Of Resolution 2019-130)

We (Richard and Tania Clark) wish to stringently oppose the development of the proposed access road onto Boyd Mill Ave as part of a Revised Development Plan For Westhaven PUD Subdivision For The Property Located South Of Highway 96 West And West Of Boyd Mill Pike.

- There is presently an alarmingly high volume of traffic on Boyd Mill Ave and this proposed residential/mixed use development and proposed entry road to Boyd Mill Ave will add a significant number of vehicles, to include many years of heavy construction traffic, and new commuters to an already overburdened and increasingly dangerous minor roadway.
- Boyd Mill Ave is continually backed up with traffic, only easing up on weekday evenings and Sunday nights after 7pm.
- There is a 20 mile an hour sharp bend on Boyd Mill that has been the scene of numerous traffic accidents involving excessive speed with cars running off the road, most recently this past weekend, a vehicle went spinning off Boyd Mill Ave, coming around the 20 mile an hour bend, landing in the ditch alongside our property and destroying the road sign while leaving a litter of debris including exterior parts of the vehicle.
- In the close to 3 years we have owned our property, I have witnessed five instances where vehicles crashed have through the fence at 1711 New Hwy 96 W , hit a tree on our property at 3270 Boyd Mill Ave or landed in the ditch requiring rescue by first responders and tow trucks. A 40 ft section of the fence at 1711 New Hwy 96 W has been destroyed due to numerous accidents and has yet to be repaired.
- The 20 mile an hour bend on Boyd Mill Ave generates excessive road noise, accentuated by the adjacent Reid Hill, as many vehicles already hit the bend at speed then often purposely accelerate towards Downs Boulevard.
- It is difficult turning into or out of our property at 3270 Boyd Mill Ave. The speed that commuters drive down that stretch of road from both directions is alarming.
- There is absolutely no room for maneuvering on this road, with a large drainage

ditch on one side, no shoulder, bicycle lanes or footpaths. Adding thousands more motorists, and large construction trucks, farm vehicles, school buses, will lead to significant frustration, delays and hazards to all citizens including children, that live along and utilize Boyd Mill Ave. There are no streetlights on Boyd Mill Ave, it is very dark along this roadway, causing visibility issues for commuters and citizens backing out of their driveways

- Boyd Mill Avenue and Carlisle Lane are not meant for the high volume of traffic that they have endured over the last several years. Placing an access road to Boyd Mill will only ensure continued traffic as some potential 1,100+ vehicles daily will continue to utilize Boyd Mill and Carlisle Lane as a cut through to Mack Hatcher at Del Rio Pike.
- I would like to propose that the planning commission review and vote on the removal of the proposed access road to Boyd Mill Ave, and revise the plans to access this development from two access points at Mack Hatcher Blvd and New Hwy 96 W presently laid out in the plan.

Richard and Tania Clark
3270 and 3244 Boyd Mill Ave

June 24, 2020

Southern Land/Westhaven,

I am in the high risk category for covid 19 and unable to attend any of the meetings to provide my comments. I hope you will read this and consider it comes from honesty with the desire to find a win/win solution for all. Ben was very gracious to send me detailed plans which I could review from home. My concerns relate to quality of life and health related issues which are adversely impacted by density, traffic, pollution and lack of connection to nature.

My overall concerns have grown over the 13 years I have lived here and are the result of watching as failed promises have been made. I totally understand some of these failed promises such as a bank, hardware store, etc as the area isn't big enough to support the current businesses and I applaud your acknowledgement of that in the reduction of the overall commercial space for Westhaven. Other promises which have been broken I do not understand or support: amphitheater, no houses on golf course, senior living in town center, church, and usable open space for family life. All of the amenities promised are necessary to the community vision you sold to all of the residents: past, current and future. Many have been waiting for years for recreational facilities promised but undelivered. It took almost 15 years before trees were planted around the large retention pond at the front of the development which was an eyesore for years. The retention pond on Westhaven Blvd took years to landscape. The new community development at the Large retention pond was funded by the residents and not Southern Land. The trails on the hillside which you bragged about at the public meeting were built and maintained by residents not Southern Land. I didn't expect to have to build and pay for amenities when I moved into Westhaven. So it is from this threshold of failed promises that I come to these recommendations for a win/win solution.

1. Remove all land on the other side of Mack Hatcher from the Westhaven Plan or at least develop it totally separately as once Mack Hatcher is extended it will not be part of Westhaven. Do not use the golf course and hillside for the open space required for its development. Consider the wishes of surrounding residents and develop that portion with separate amenities and plenty of open space to ensure quality of life.
2. Maintain the other side of Mack Hatcher at the current entitlement of 2750 and a density in line with the current average of 1.8 units per acre or actually it will drop slightly as you take the current 56 acres out of the plan. As the remaining sections are built add open space in each section for all ages to enjoy. Delete the houses from the golf course as originally promised.
3. Build the senior housing on the property behind Kroger within the existing 2750 entitlements as originally planned so the residents may walk to grocery, doctor, PT, restaurants and shops. This is very important to the quality of life for seniors and would be a real draw to maintain a full facility. Quit pretending they would have access if on other side of Mack Hatcher.
4. Maintain the wetland area behind the Kroger and partner with City of Franklin and Audubon Society or other groups to make it a bird sanctuary with easy access to the senior housing. This would be a win for all and help Franklin with it's quest to become a top green city. Use the wetlands as a teaching resource for the local school and others as it will be close to 96. Senior residents and

others would love to sit and watch the water and other birds at the wetlands. If there is enough space consider putting soccer or open fields adjacent to wetlands for play to enhance the feel of open space. Seniors love watching kids play and would have chances to interact with the Westhaven Community.

5. Work with the City of Franklin to address traffic issues and slow the flow of traffic.

6. Agree to a conservation easement for the hillside property to be turned over to HOA at end of the development to ensure it remains part of Westhaven.

7. Do not build any more buildings around the large retention pond to maintain the open feel.

8. Deliver on prior promises for amenities: pool, amphitheater, playgrounds, basketball, baseball, dog parks and all the other things that make this a livable community.

I believe this offers a solution and hope you will carefully consider the ideas. I am glad to discuss via telephone.

Cindy Whitt

5. Work with the City of Franklin to address traffic issues and slow the flow of traffic.

6. Agree to a conservation easement for the hillside property to be turned over to HOA at end of the development to ensure it remains part of Westhaven.

7. Do not build any more buildings around the large retention pond to maintain the open feel.

8. Deliver on prior promises for amenities: pool, amphitheater, playgrounds, basketball, baseball, dog parks and all the other things that make this a livable community.

I believe this offers a solution and hope you will carefully consider the ideas. I am glad to discuss via telephone.

>
> Dear Board Members,
> I have submitted previous comments but want to add a few additional concerns after reviewing the revised plans and the Hydrological Determination made by TDEC.
>
> I have serious concerns that the concept plans submitted to the neighborhood and the City of Franklin will not be able to be built based on the streams and wetlands identified by TDEC. If the land will not support the structures proposed, where will the entitlements be built and what type of public review will be allowed before decisions are made?
>
> I also have serious concerns about infrastructure to support the additional entitlements:
>
> Water and sanitary sewers are not adequate
>
> Roads and exits from the neighborhood are not adequate
>
> Additional open space was not placed inside the areas to be developed which would allow play space for children
>
> Stress will be placed on the school system which has not been able to keep up with existing and already approved developments
>
> City staff are not adequate to over see and monitor compliance with zoning laws and stormwater laws which will pose additional harm to the environment
>
> The addition of this many units and streets, alleys and sidewalks will add enormous amounts of stormwater runoff and it appears after every rain the existing controls are not adequate at current levels.
>
> Please carefully consider all of these factors before making a decision as well as all previously approved developments in this area. The cumulative impact should be considered not just the incremental impact. Thank you,

Subject: In support of SLC proposal for Jewell Property
Date: Monday, August 24, 2020 4:20:25 PM

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

As a resident of Westhaven, I'd like to voice my support for the age restricted use proposed by SLC for the Jewell Property.

I feel the type resident of that area will offer less stress to our schools and to our traffic.

Southern Land also has a demonstrated ability to create attractive features and landscapes and will build in a style complimentary to the existing Westhaven community.

I feel they should be the developer of the Jewell Property and I am in favor of a 55+ community in that space.

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

I absolutely do NOT support the change to the Westhaven community plan. They have not included the residents in these decisions but have rather 'told' us what they are going to do and acting like we have voiced support, but none of us have had an opportunity to discuss this with them, and none of their 'supposedly scheduled meetings with residents' have occurred.

The last thing we need are more homes in Westhaven, unless they want to do an affordable housing initiative. I cannot and will not support more homes vs commercial.

Sincerely,

Gabrielle Hanson

Subject: Petition Names for Support - Westhaven Concept Plan and Jewell Property
Date: Wednesday, August 26, 2020 12:15:17 PM

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Good Afternoon – During the month of July, 2020, residents of Westhaven were surveyed to gauge interest in the active adult and independent living concepts proposed for the Jewell Property.

The following residents asked that their names be included on a petition as supporters for the proposed development of the Jewell Property, along with, supporting the changes to the Westhaven Concept Plan. These individual resident's names take the place of 129 separate emails being sent in to the Planning Commission for support of both initiatives to be discussed Thursday evening, August 27, 2020.

We write in support of the Westhaven Concept Plan that will be considered on this coming Thursday, August 27, 2020

We have been residents of Westhaven since August 2004, and we have watched Southern Land bring our development steadily and thoughtfully to where it is today. The community they and the residents have created is one we totally embrace, and it is clear from the last few months that that feeling of community has only strengthened. The prospect of being able to grow old and still be in our own, smaller, home in Westhaven is of great interest to us.

Southern Land has always delivered on what they have envisioned from the beginning and we expect this latest phase will be no different.

We urge you to support their latest plans going forward.

Sincerely,

Marcia and John Fraser

Subject: Question for SLC - Westhaven
Date: Wednesday, August 26, 2020 2:28:44 PM

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Hello-

My main question is to get confirmation that there will NOT be any plans for attached homes or townhomes on Stonewater Boulevard as part of the revised density plan for Westhaven. This street along with Championship Boulevard should be maintained as single-family homes. We are in an area of custom homes, so adding attached or townhomes on the extension of Stonewater Boulevard would detract from the overall esthetics of our street, including adding additional traffic and congestion in the area.

Thank you
Sue Niedrich

My name is Colin McArthur, and I live at 1306 Jewell Ave in Westhaven. Having lived in and been President of a gated 900 home HOA in the Beaufort-Hilton Head, SC area, I am very familiar with both resident-owned and developer managed communities. I strongly support Southern Land Company's (SLC) proposed changes to their concept plan and their plans for the Jewell property. I would appreciate the strong support of these plans as I believe SLC and their leadership under Tom Downey, will provide Franklin another well thought out design.

Thanks,
COL Mac

My name is Kelly Bryan and I live at 1602 Championship Blvd, Franklin, TN 37064 in Westhaven. I love this community and think Southernland has done a great job not only in its development, but also in fostering the activities and connections that make this neighborhood special.

I fully support their proposed concept changes especially as they relate to the future use of the Jewel property. My husband and I are in our 60s and have found Westhaven a great place to be retired and this has been further emphasized during this time of the corona virus.

As we continue to age, I can see a time where we will need independent living facilities. I think that move would be far more successful within a neighborhood where we already comfortable and have a strong support network.

Thank you,
Kelly Bryan

Dear members of the Franklin Tn planning commission.

My name is Meg Butler Curtis and live at 250 Pearl Street. (We have lived in Westhaven for 16 years.)

My family and I are in full support of Southern Land Company and the changes to the concept plan as well as the proposals for the Jewel Property.

My family has been in Franklin for nine generations, including your alderman Margaret Martin, my mother. Southern land has created a true traditional neighborhood development where my family has felt comfortable and was so blessed to be here over the last 16 years. Their decisions have been spot on in creating this type of environment that my father, Robert Martin, your past planning director, supported for Westhaven. We are in full support of SLC and what they have planned. This is what they do best.

Sincerely,

Meg Butler Curtis

Subject: Westhaven /HWY 96 /Gentry Farm
Date: Wednesday, August 26, 2020 4:52:16 PM

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Good Afternoon, I am writing to express my deep concern for the current landscape of development in the HWY 96 corridor. As a native of the area, I have witnessed much change over the years. I understand that farming isn't what it used to be and that families may not be able to afford to keep large parcels of expensive land these days. Therefore, it is even more imperative for the Board and Planning Commission to have and stick to a vision of development for the area when it MUST happen. The natural landscape and open spaces draw people to this side of Franklin. It certainly did for us. Sadly though, it seems to be viewed as "The Field of Dreams" now, attempting to grow and destroy the very essence of the area. I certainly see where the concept of Westhaven would have been viewed as cutting edge and exciting, but it has become a beast. It is, itself, suburban sprawl when looking westward from the traffic light at Hwy 96 and Carlisle Ln. BOMA and the Planning Commission allowed the developer to cut into the hillside and to count a private golf course into the matrix for meeting green/open space requirements. Now the developer wants to cram even more small houses onto smaller lots and it just doesn't meet the aesthetic of the original part of Westhaven. I feel there is always an element of compromise to be had and hope that the Board will take the time to look at a variety of options before giving SLC carte blanche on their high-density requests. I still support SLC's desire to develop the property east of the Mack Hatcher extension for an age-restricted development as it will not negatively impact WCS schools and would certainly be more aesthetically pleasing than a Walmart. But I cannot see a plus to allowing nearly 3500 homes in the current space of Westhaven, especially if to do so negatively impacts Gentry Farm to increase roads, sewer, etc.

Respectfully,
Tara Baldwin

Subject: Westhaven Concept Plan / Jewell Property
Date: Tuesday, August 25, 2020 1:44:55 PM

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

With the purchase of the property adjacent to the Westhaven subdivision along Highway 96, Carlisle / Boyd Mill intersection, and Mack Hatcher Parkway and with the plans to construct facilities for 'aging in place' an additional living option will be provided on the western side of Franklin. Since the facility would be nestled between Carlisle / Boyd Mill, Highway 96, and Mack Hatcher Parkway there could potentially be three (3) entry / exit points which would allow those residents to determine which street to travel and avoid downtown Franklin. This proposal could potentially result in a near zero impact on traffic.

With the aging in place option for many citizens, it provides the opportunity for many to continue living in an area of the town / county close to family and friends which in turn results in more social interaction for the elderly and less reliance on other facilities and government services.

Dear Planning Commission -

Thank you for all the work you do to make Franklin such a great place to live.

I am writing with my input on the Westhaven Concept Plan / Jewell property plans which will be discussed this Thursday evening at the Planning Commission meeting. It is my understanding that emails will not be read at the meeting, which will probably save a great deal of time! I suspect that my input is similar to many others.

I have lived in Westhaven since 2006. I read the City's land use plan carefully before deciding to buy in Westhaven. I was impressed by the multi-generational opportunities Southern Land presented with a variety of housing layouts in same neighborhood along with plenty of green space.

I have watched both Franklin and Westhaven grow and I've been impressed. It isn't an easy job!

My husband and I intend to live here in Westhaven for the remainder of our days. I am very interested in more housing options for seniors and pocket parks / green space. I am just barely a senior, but my mother lives in our garage apartment. This is a fine option for now, but may not work as she grows older.

I support Southern Land's proposal for the Jewell property.
I would like to see the areas on each side of Mack Hatcher connected by a tunnel.

The Westhaven concept plan changes also have my support, with these comments:
I think we need more live/work friendly housing (perhaps even more than is under consideration now) and a continued attention to green space. Southern Land has delivered in the past, and I trust them to do a fine job in these areas. I understand why they've decreased the amount of retail and commercial. This change preceded the pandemic and certainly looks prescient now.

Thank you for the opportunity to email my input,
Laurie Weakley

ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.

Planning Commissioners,

There have been numerous meetings in the last few months between Westhaven residents and the Southern Land executives. I believe these meetings were extremely informative to all in attendance. The give and take was quite useful for both the residents and the developer. I know that I was in awe of the care, thought and planning that was given to past and current projects. We have a great history in Westhaven of watching exactly how Southern Land projects turn out and that is why people want to live here. I strongly support the Westhaven Concept Plan changes and the proposed plans for the Jewell property. Southern Land's commitment to Franklin and Westhaven is quite refreshing and a great asset to our city.

Thanks,

My name is Judith Walter and I reside at 6000 Keats Street, Unit 102, Franklin, TN.

I would like to express my support for the Southernland Company's plan for a senior living community made up of individual residences and a building of independent living apartments. I currently reside in Westhaven in a condominium that has been a wonderful alternative to a house. However, as my husband and I age, the idea of an age restricted community, including an independent living apartment option with additional amenities and no responsibilities as a homeowner, is not only appealing but will also become a necessity. We do not want to live in an assisted living community, unless there are health care needs to be met. This proposed community offers what many/most of us will need as we grow older. There are many residents in Westhaven who are approaching the age served by the Amended Concept Plan and most of us would welcome the opportunity to continue life in this community.

I appreciate your consideration of this plan to serve the growing senior community in Franklin.

Sincerely,

Judith Walter

Dear Planning Commission Members,

We are in full support of the Westhaven Concept Plan changes. We have had the opportunity to review these changes, in detail, with representatives of Southern Land and believe these changes are in the best interests of our Westhaven Community, in particular, and of greater Franklin, in general.

We have lived in Westhaven for 6 years and have found the leadership of Southern Land to be highly responsible, ethical, professional, and always sensitive to the interests of its residents.

We are fortunate to have them responsible for the development and ongoing operations of our Westhaven community.

Thank you for your consideration of this plan.

Respectfully,
Chris and Stephanie Marin

Ms. Hunter,

I attempted to submit prior comments to be attached to the record and got email rejections 4 times. I sent the comments to Mayor Moore and he assured me he would get them included.

I would like an electronic copy of the Hydrological Determination Report submitted with the plans. I am attaching the reference to the report on the plans which are available online. I noticed some of the concept plans include large buildings in the marked riparian buffer zones and wondered if you could explain how this will be allowed.

Thank you,

Cindy Whitt
